20 years of the Dresden plant: Jungheinrich invests in expansion

- **For 20 years, the Dresden plant has been setting standards in the reconditioning of industrial trucks**
- **Jungheinrich is currently investing in the expansion and future of the site**
- **In future, Dresden will become the centre for special-purpose vehicle manufacturing within the Jungheinrich Group**

For 20 years, the Dresden plant has been setting standards in the reconditioning of industrial trucks. Jungheinrich is now investing millions in the plant's expansion and is focusing the site on special-purpose vehicle manufacturing and small-batch production.

Klipphausen – To mark its 20th anniversary, Jungheinrich is setting the course for the future of its Dresden plant: the company is investing around five million euros in the expansion of the site in Klipphausen and is focusing production on special-purpose vehicle manufacturing and small-batch manufacturing. The refurbishment of the plant is already in full swing.

Since its foundation in 2006, the Dresden site has set new standards in the reconditioning of industrial trucks. More than 100,000 forklift trucks have been reconditioned here and made fit for a second or third life. The site is now taking on a new role within Jungheinrich's production network.

In future, customised special-purpose vehicles that go beyond Jungheinrich's standard product range will be manufactured in Dresden. To this end, production areas are being converted and refitted. In addition, Jungheinrich has recruited 40 employees for this new role.

The reconditioning of used equipment will in future be centralised at Jungheinrich's Ploiești site. In the Romanian city, the company is currently moving into a new production facility covering 25,000 square metres.

"For 20 years, Dresden has stood for adaptability and industrial expertise. With the current expansion of the plant, we are consistently building on this strength and giving the site a clear future within the Jungheinrich production network," says Tino Alban, Plant Manager in Dresden.
