

# Safety is child's play when you have everything covered.

360-degree protection by Jungheinrich.

Our many safety solutions cover all five risk areas in warehouse environments. This overview will show you how our 360-degree protection covers people, goods, warehouse equipment, machines and data.

## 2. Protecting goods.

Reliable protection for your valuable goods.

Your stored goods are a valuable asset. Different assistance systems help you to protect them properly, while saving both time and costs. This means you not only protect your goods and your employees, but also your warehouse productivity and ability to deliver.

## 3. Protecting warehouses and equipment.

Intelligent warehouse planning.

With more than 60 years of experience, we offer integrated, intelligent warehouse planning services to help to promote a safer and more efficient workplace.

## 5. Protecting data.

Ensure everything stays where it belongs.

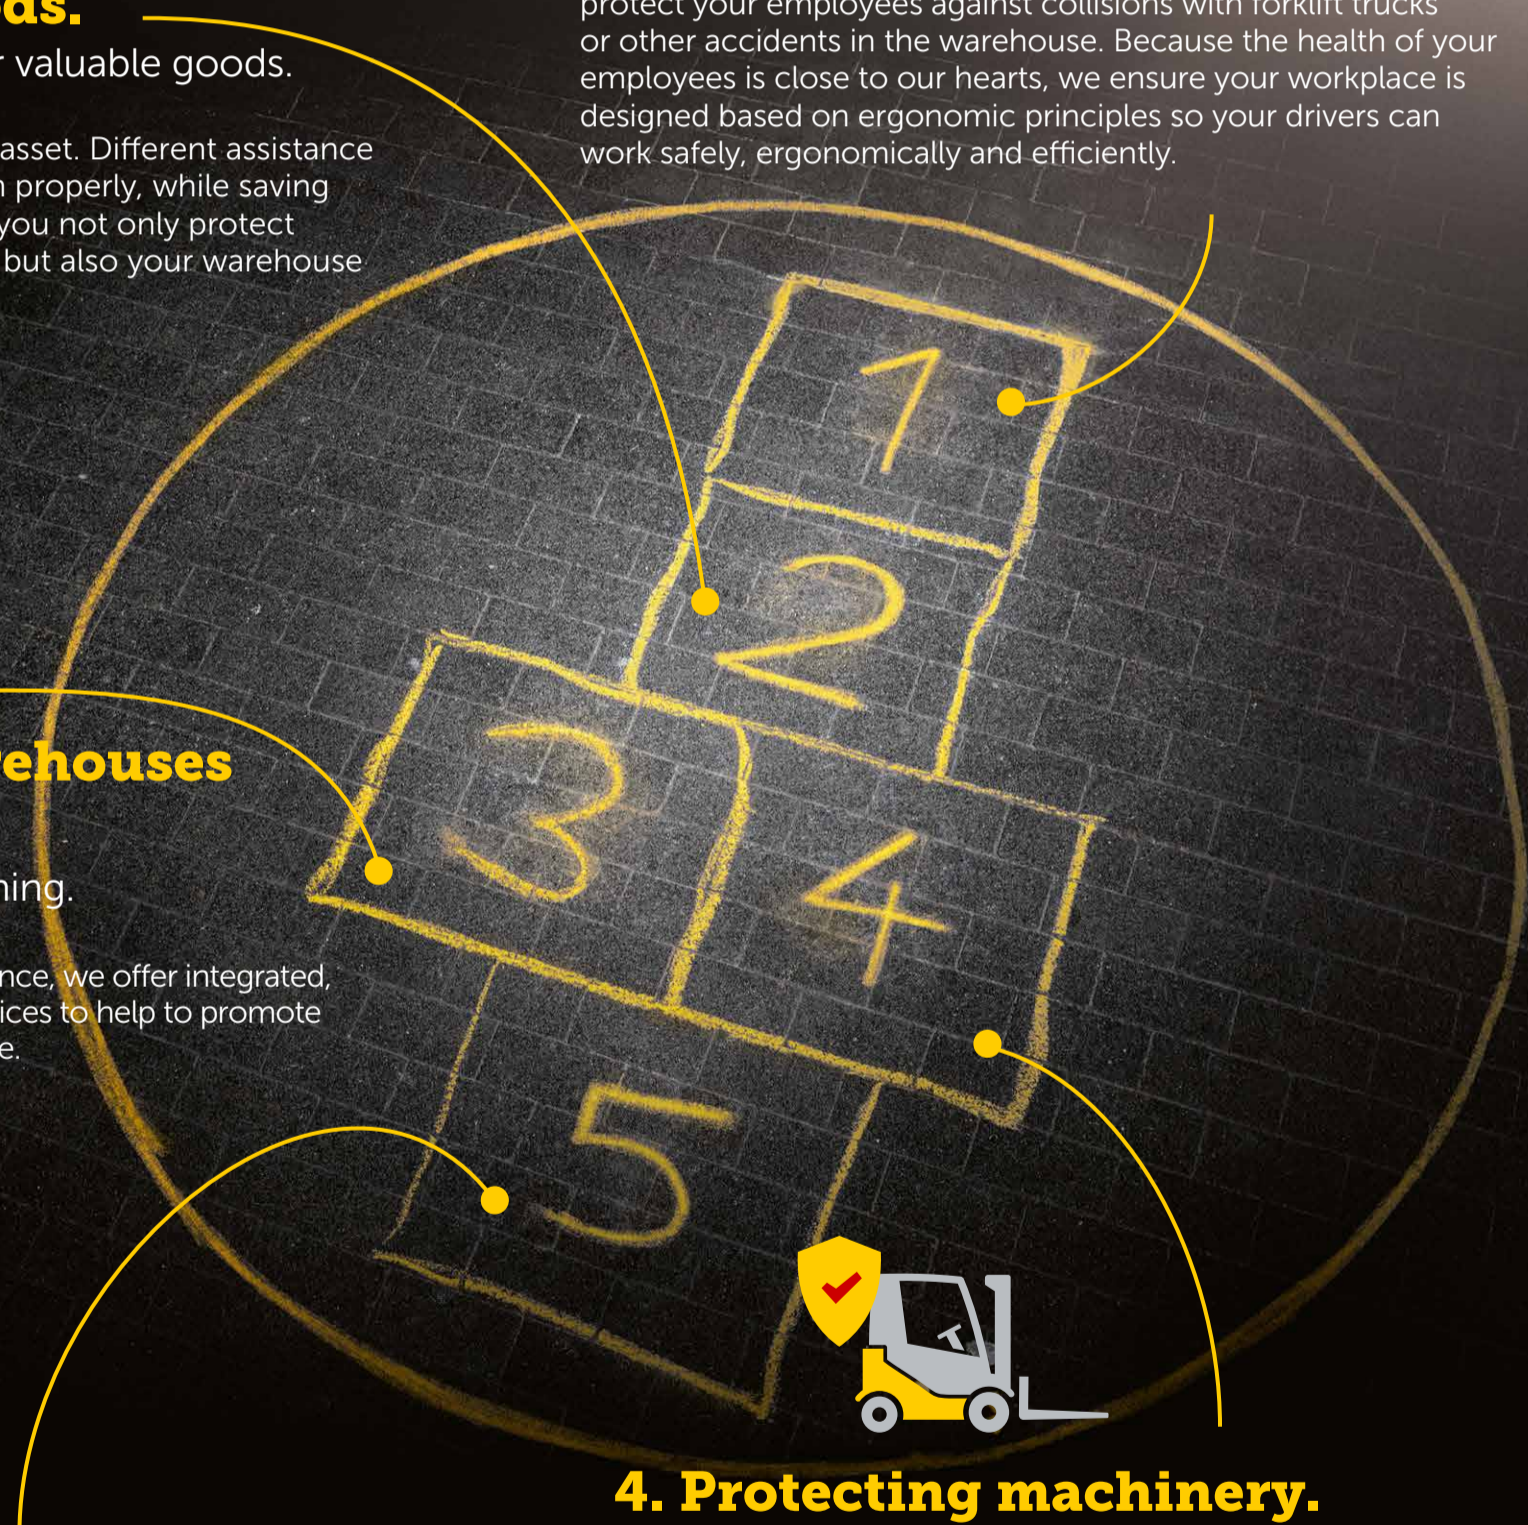

In times of increasing digitalisation and connectivity, solutions for downtime protection and data security should be part of every safety strategy. It is very important that our digital solutions are robust and secure to assist in the protection of your data.

## 1. Protecting people.

Because people are the most important.

Our end-to-end safety concept is something you can rely on. We offer a number of vehicle options to help to protect your employees against collisions with forklift trucks or other accidents in the warehouse. Because the health of your employees is close to our hearts, we ensure your workplace is designed based on ergonomic principles so your drivers can work safely, ergonomically and efficiently.

## 4. Protecting machinery.

Significantly reducing accident numbers.

With various safety features and regular maintenance, we help you to not only minimise the risk of forklift truck accidents, but also ensure long-term performance and truck availability.
