Shape the future as DevOps Engineer f/m/d

Without Jungheinrich your shopping cart would probably remain empty. And it does not stop there! Every day our devices transport millions of goods in logistics centres all over the world. At Jungheinrich Digital Solutions S.L. we develop intelligent warehouse management solutions and process-reliable warehouse automation for our customers – and we are looking forward to receiving your application.

DevOps Engineer f/m/d
Location Spain (Madrid)

Set things in motion.

- In your responsible role, you ensure the use of a modern and stable software development infrastructure for the C++.
- You evaluate the requirements from our product development and project implementation teams and try to continuously improve the DevOps pipeline.
- Using your established expertise, you are responsible for the analysis and conception as well as the implementation of improvements to the tools used and thus ensure efficient and modern software development.
- Support and improve Jenkins pipelines for C++ applications.
- Improve the code coverage tool and support cached compilation.
- Compiler upgrades and dependencies management.

Use your skills.

- Solid technical education (advanced technical college/university of applied science/university of technology) in the fields of computer sciences, software development or similar.
- At least 2 years of professional experience in the use and/or administration of modern tools for software development (CI/CD, Git, CMake, gcc, Jenkins, Python..).
- Experience required in the area of software programming would be very valuable.
- Experience with Conan C/C++ package manager would be very valuable.
- Experience in distributed development (several locations) would be of advantage
- High command of English (at least B2+ level)
- Good communication skills and team player
- Solution-oriented approach.
- Independent, systematic and structured way of working

Gain more.

- Attractive salary dependent on your qualifications and experience
- Friendly and informal atmosphere in an international company that cares about an excellent team spirit
- Challenging, independent work in an innovative and creative environment
- Company-internal d benefits
- Professional and personal training opportunities to advance your career
