# Performance for the highest demands.

The versatile and efficient electric forklift trucks in the EFG 4 series are the perfect choice for transporting goods internally when heavy loads need to be handled quickly. Capacities of up to 3,500 kg also make them particularly ideal for applications using attachments.

## Powerful e-performance at optimum efficiency.

A whole new level of productivity: benefit from increased travel and lift speeds as well as enduring lithium-ion technology for maximum performance with minimal energy consumption.

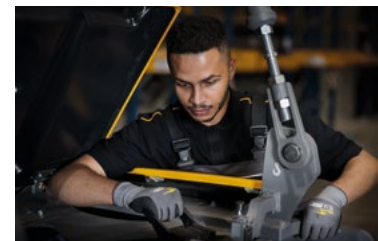

## No compromise on safety.

Optimum view thanks to panoramic roof with slimline B-pillar design. Safety at every turn with curveCONTROL as standard. Plus, the huge range of optional assistance systems provides even more protection.

## Sophisticated ergonomics for maximum comfort.

The intuitive operating concept and highly customisable operator position, the maximum legroom and not least the modern audio and sound system ensure an optimum working atmosphere.

## Service and support for your truck.

Remain on the safe side even after your purchase: choose an individual service package from our extensive portfolio.

Find out more about the Jungheinrich EFG 4 and discover the ideal model to meet your requirements. Whether buying or renting, be it a single truck or a fleet, talk to your local consultant.
