Connect intralogistics.
This is your chance.

Shape the future as Senior Full Stack Developer m/f/x

Have you always wanted to make a difference? With innovative solutions and services in the field of intralogistics, Jungheinrich Digital Solutions S.L. helps its customers to master their individual challenges every day – something you already benefit from without even realizing it. In a modern, agile environment, our internal team works on topics ranging from embedded development to micro services and state-of-the-art frontend design so that our customers can easily harness the power of IoT and the data generated by our fork lift trucks.

Senior Full Stack Developer m/f/x
Location Spain (Madrid)

Set things in motion.

- You develop in and contribute to all areas of our product, from Product design to operations (DevOps).
- You are an experienced front-end developer that is also capable of extending backend services or a seasoned backend developer that can adapt UIs if needed.
- You write clean, maintainable, and well-tested code within a self-organized, international team.
- You believe that understanding the theory behind the problems you are solving is important.
- You think in continuous improvements instead of huge releases (CI/CD) and monitor your deployed solutions.
- You take responsibility for delivering on time and actively manage dependencies.

Use your skills.

- At least 6 years of experience developing modern web applications, ideally using Node.js, JavaScript/TypeScript, React (or other frontend framework like Angular or Vue) and AWS Cloud.
- Experience working in agile environments (SCRUM), with the development of new products as well as extension of existing products (Continuous Delivery) and its operation (DevOps)
- Experience with software development best practices and automatic testing and CI/CD tools (Jenkins, GitHub Actions...).
- Solid understanding of performance factors, scalability, concurrency, computational complexity.
- REST API design experience very valuable for the position and IoT knowledge also highly appreciated.
- Excellent team-working and communication skills.
- High level of written and spoken English (C1).
- Creative, organized, solution-oriented, critical thinking.
- Nice to have:
  - Experience in Infrastructure (AWS) and Big Data knowledge
  - Experience in DB (MySQL/relational DBs)

Gain more.

- Attractive salary dependent on your qualifications and experience
- Opportunity to both contribute with your experience as well as learn from ours
- Friendly and informal atmosphere in a company that cares about an excellent team spirit
- Challenging, independent work in an innovative and creative environment
- Company-internal benefits
- Professional and personal training opportunities to advance your career
