# Barriers to entry?

## We have overcome them all!

Our entry-level models in the EFG B Series provide everything you could expect from a Jungheinrich electric forklift truck. Quality, performance, reliability, efficiency, safety. And the terms are surprisingly appealing! Attractive purchase costs, fast delivery times and extensive equipment. Plus, if you choose the lithium-ion version of the entry-level models in the B Series, you can opt today for the technology of tomorrow.

### Accept no compromises with lithium-ion

If you wish, you can opt for lithium-ion technology in our entry-level models. The system, which is designed for efficiency, offers consistently high performance and optimal energy consumption.

### Long service life

Jungheinrich's high standard of quality guarantees the long service life of our robust electric forklift trucks.

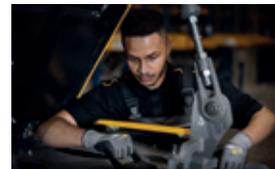

### Sophisticated safety

In addition to performance, the focus is on safety: Our B Series trucks feature optional equipment such as the Floor-Spot and assistance systems such as the standard curveCONTROL and driveCONTROL.

### Outstanding performance

The intuitive and ergonomic operation, excellent visibility and practical manoeuvrability, thanks to the twin-motor front drive, enable a strong performance in everyday use.

### Support and service

You remain in safe hands, even after your purchase: Choose an individual service package from our extensive portfolio.

**Optimise your fleet now with an electric forklift truck from the B Series.** Whether buying or renting, be it a single truck or a fleet of trucks, talk to your local consultant.
