

Warehouse Management **Jungheinrich WMS Essential**

The professional system for managing small and medium-sized warehouses.

JUNGHEINRICH

The simple solution for your professional warehouse management.

For the efficient control of small and medium-sized warehouses.

Invest in the digital future of your warehouse and switch from analogue to digital now with Jungheinrich WMS Essential. The intelligent solution for professional warehouse management provides you with tried-and-tested, standardised processes and functions that help you manage small or medium-sized warehouses more easily, efficiently and cost-effectively than ever before.

The simple implementation process also enables you to quickly familiarise yourself with digital warehouse management and benefit from a number of advantages such as increased efficiency and cost savings. In addition, Jungheinrich WMS Essential is forward compatible and can be extended or upgraded at any time.

Discover a software package full of potential and look forward to optimised material flow, high productivity, low error rates, delivery readiness at all times and transparency in your warehouse.

All benefits at a glance

- Efficient control of small and medium-sized warehouses.
- Rapid implementation thanks to standardised processes.
- Unlimited expandability thanks to modular design.
- Full forward compatibility for unrivalled future security.
- Attractive introductory price and unique licensing model.

Your Jungheinrich software for maximum customer benefits.

Efficiency

Improve the efficiency of your warehouse.

By digitising your processes, you can increase productivity from goods receipt via internal processes to order picking and goods outward.

Efficient processes

- Optimised material flow.
- High level of productivity.
- Elimination of searches.
- Inventories made easy.
- Attractive entry price.

Maximum transparency

- Storage space-specific item management.
- 99.9% inventory accuracy.
- Delivery readiness at all times.

Space-saving storage

- Increased profitability due to reduced inventory levels.
- Best possible use of space.

Easy integration

- Integration into your existing IT system landscape via an interface to many of the commonly used host systems.

Simple operation

- Fully intuitive operation thanks to modern, user-friendly interface.
- Very short training times.
- Efficient and effective work processes thanks to system support.
- 20% fewer clicks required as a result of optimised screens.

Safety

The optimal solution for maximum control.

Mapping your warehouse structure and processes in the system enables you to keep track of your inventories and orders at all times with the Jungheinrich WMS Essential – now and in the future.

Improved process reliability thanks to reduced error rates

- Accurate item management.
- Perfect warehouse overview thanks to real-time updates.
- No out-of-stock situations.
- No delivery delays.
- Fewer returns.

Always future-proof

- Choose from a range of optional add-on modules for easy expandability or a fully customised Jungheinrich WMS.
- Unique forward compatibility for updating or expanding the system as required.

24/7 support

- Comprehensive service and support concept.
- Efficient warehouse processes long after commissioning.
- Round-the-clock support, 365 days a year.
- Rapid response to all your requests via remote connection.

Individuality

Software as individual as your company.

Customisable modules and a host of standard features ensure your warehouse is more efficient, easier and less expensive to control than ever before.

Wide range of modules and functions

- Flexible adaptation to your needs through multi-dimensional configuration model and industry-specific modules.
- Numerous tried-and-tested, standardised functions.
- Basic module consisting of warehouse mapping, goods receipt and goods outward, inventory, master data management, control panel and host interfaces.
- Additional functions such as master data management, ABC zoning, batches and best-before dates, bypass and mixed load aids.
- Compatible with standard warehouse technology such as racking pallet systems, block pallet systems and shelving systems.
- Optimal expansion modules to create a smart standard solution for your company.

Unique licensing model

- Use of the standardised warehouse management system in exchange for a monthly fee.
- No minimum contract period.
- One-off set-up price and monthly usage fee.
