

## Services

### Jungheinrich tyre service

The reliable replacement of castors and wheels.

 **JUNGHEINRICH**

# Keeping you safely on the ground.

## The Jungheinrich tyre service.

Should damage occur, our reliable and expert Jungheinrich tyre service will quickly supply you with the most common castors and wheels to avoid expensive downtime which reduces your productivity.

The tyres and castors on your forklift trucks provide a secure connection between the truck and the ground, which is why you should pay particular attention to tyre care. Minimise the safety risk when cornering or braking by promptly replacing worn or damaged tyres.

With more than 5400 after sales service engineers around the world, our service staff are able to react when required, equipping you immediately with quality tyres from premium manufacturers. In order to keep downtime as short as possible, these tyres are pressed and installed directly at your premises.

### Service and Support all from one provider

#### Service and Support all from one provider.

Worldwide standards in service quality, short distances to the customer and Jungheinrich employees who do everything they can to keep your truck fleet running smoothly. So you can fully concentrate on your core business.

- Value retention of trucks due to timely replacement.
- Reliable service and controlled quality from a single source

# Your Jungheinrich tyre service for **maximum performance.**

## Safety

Best conditions for working safely.

Damaged tyres can quickly become a safety risk and, in a worst case scenario, can result in longer downtime. Check the quality of your tyres regularly and contact our tyre service if necessary.

### Optimal ergonomics

- Use of ergonomic tyres to increase occupational safety and efficiency.
- Prevention of additional physical strain in the event of strong vibrations caused by poor or unevenly worn tyres.

### High safety standards

- Perfect tyres for short braking distances and safe cornering.
- Best possible support thanks to the high level of manufacturer expertise of our service staff.

## Efficiency

Maximum performance with the most efficient service.

Whether your truck is electric or has an IC motor, our tyre service staff will certainly have all common and available tyres and tyre sizes ready for you. This will ensure that your everyday warehouse operations will never go flat.

### Reducing downtime

- Minimised downtime of forklift trucks thanks to quick tyre changes.
- Fewer truck breakdowns thanks to timely replacement of worn tyres.

### Optimising performance

- Professional retreading of tyres for greater durability and reduced fuel consumption.
- Wide range of tyres as well as advice from Jungheinrich After Sales Service on tyre selection.

### Rapid restoration of operational readiness

- Time savings thanks to prompt tyre service at your premises.
- Fixed appointments to optimise planning.

## Reliability

A service as versatile as your business.

Save yourself expensive truck downtime and rely on our expert tyre service in an emergency – it will have your forklift trucks back on the road in no time at all.

### Minimised truck wear

- Changing the tyres in good time saves truck downtime due to consequential damage.
- Regular tyre checks ensure that tyres still easily reach the maximum lift height when in use.

### High-quality tyres

- The Jungheinrich tyre service uses only quality tyres from premium manufacturers.
- High-quality tyres guarantee the necessary ground clearance and prevent trucks getting stuck when used outdoors.

The German production facilities in  
Norderstedt, Moosburg and Landsberg
