

For system trucks, the following additional delivery conditions also apply:

Price:

The offered price for the high-rise truck(s) includes the delivery and commissioning of the specified high-rise truck(s).

Instructions to the driver(s):

The price also includes driver instructions. This driver instruction takes half a day. For proper instruction, the maximum group size is approximately four (4) people. We recommend that you have the relevant driver(s) attend a forklift truck training in advance.

Not included:

Unless stated otherwise in the offer, the following items are not included:

- Assembly of accessories and (RF) equipment supplied by the customer;
- Tools for positioning (e.g. positioning sticker);
- Floor markings;
- Location indications, number plates, etc.;
- Further organisational preconditions.

Load-bearing capacity:

The stated load capacities of the high-rise truck(s) are a theoretical indication. In case of deviation(s) compared to the standard version of the high-rise truck(s), the final specification of the load capacity will take place after the FEM stability test at the factory.

Installation time:

The time for the assembly and the adjustment of the high-rise truck(s) is based on a flatness of a floor surface according to the usual requirements for a floor. Additional work arising from an insufficiently flat floor shall be for the account of the customer.
