Jungheinrich retrofitting

Original retrofit solutions from Jungheinrich.

JUNGHEINRICH

for maximum efficiency in the warehouse.

With original retrofits from Jungheinrich, not only do you increase productivity and safety in your warehouse, but you also improve the efficiency of your forklift trucks significantly. Even with simple retrofit options, you can easily adapt your trucks to satisfy new requirements.

The demands that a forklift truck needs to meet frequently change over the course of its life – be it due to new safety specifications, statutory regulations or modified warehouse and logistics processes. With our reliable retrofit solutions, you can respond quickly to changing requirements, in order to fulfil new regulations relating to occupational safety without costly modifications.

To assist you with the implementation of individual retrofit solutions, our qualified service engineers are on hand to equip your trucks or even the entire warehouse environment in line with the very latest standards.

Service and Support all from one provider

Service and support all from a single source.

Worldwide standards in service quality, short distances to the customer and Jungheinrich employees who do everything they can to keep your truck fleet running smoothly, leaving you free to concentrate fully on your core business.

Original spare parts & Accessories

Original spare parts & accessories

Whether you have a forklift truck or a fully automated logistics system, you can trust in our excellent service with original spare parts and accessories from Jungheinrich. Because only the original provides reliability and safety while retaining maximum value.

All benefits at a glance

- Fully integrated retrofit solutions for all trucks.
- Increased productivity and safety in the warehouse.
- Outstanding manufacturer expertise and extensive product range.
- Tailored to the performance requirements of your trucks.
- Unchanged warranty and documentation.

Jungheinrich original retrofits for **maximum performance.**

Safety

Best conditions for working safely.

The retrofitting of important safety functions is always worthwhile – be it in the form of visual early warning systems, access control or shock sensors. With our original retrofit solutions, your trucks will be well equipped to overcome all challenges in the warehouse.

Truck-specific assistance systems:

- LED working lights for maximum illumination with minimal energy consumption.
- Floor-Spot visual early warning system in various versions.

Compliance with current safety regulations:

- Original retrofits for fulfilling new statutory regulations and occupational safety requirements.
- CE marking and unchanged warranty.

Efficiency

Maximum performance with the most efficient solutions.

Jungheinrich retrofit solutions ensure that your trucks will always be state-of-the-art. Only optimum interplay between all components will guarantee maximum warehouse efficiency.

Lithium-ion retrofits:

- Increase energy efficiency by up to 25% when your trucks are retrofitted with powerful lithium-ion batteries.

Increased productivity in the warehouse:

- Wide range of retrofit kits as fully integrated or stand-alone solutions.
- Maximum efficiency with integration of the electrical retrofit kits in the truck controller via the CAN bus system.
- Availability of original retrofits based on truck model and equipment.

Reliability

Solutions as versatile as your fleet.

Optimum integration: our original retrofit solutions will help you to fulfil new requirements for your forklift trucks without requiring major conversions or to equip your trucks according to your own individual needs.

Wide range of retrofit solutions:

- In combination with intelligent CAN bus technology, our fully integrated solutions guarantee maximum reliability.

Qualified Jungheinrich service engineers:

- Professional configuration of trucks and warehouse environment by qualified service personnel.
- Outstanding manufacturer expertise and extensive product portfolio to meet individual customer requirements.
