Four times platinum in a row: Jungheinrich is one of the most sustainable companies worldwide

- **Fourth consecutive platinum award from EcoVadis**
- **Jungheinrich consolidates its position among the top 1 per cent of the most sustainable companies in the world**
- **Expanded commitment to transparency and climate protection**
- **Progress in responsible resource extraction through joining IRMA**

Jungheinrich has been awarded the EcoVadis Platinum sustainability certificate for the fourth year in a row, consolidating its position among the top 1 per cent of the world's most sustainable companies.

Hamburg – The international CSR rating agency EcoVadis has awarded Jungheinrich a platinum certificate for corporate responsibility in sustainability for the fourth time in a row. By once again receiving the platinum certification, Jungheinrich continues to be among the top 1 per cent of the world's most sustainable companies. The award recognises Jungheinrich's outstanding commitment to the environment, labour and human rights, ethics and sustainable procurement.

"The platinum certification confirms our consistent commitment to sustainability. We have a corporate and personal responsibility to leave a world worth living in for future generations. For us, it is a matter of course to fulfil this responsibility," explains Dr Lars Brzoska, Chairman of the Board of Management of Jungheinrich AG.

Effective measures for more transparency and climate protection

EcoVadis once again highlighted Jungheinrich's outstanding performance in environmental protection. In particular, the company further expanded its climate protection measures last year and created even more transparency regarding the emissions of its vehicles by calculating the Product Carbon Footprint of numerous product series. This analysis provides information on the CO_{2e} emissions of the vehicles throughout their entire life cycle – from resource extraction, production, transport and use to disposal.

Progress in responsible resource extraction

In 2024, Jungheinrich became the first intralogistics provider to join the Initiative for Responsible Mining Assurance (IRMA). The global multi-stakeholder initiative is committed to more socially and environmentally friendly mining. As part of its lithium-ion strategy, Jungheinrich is particularly keen to promote the sustainable mining of lithium. Joining the initiative underlines the company's commitment to greater transparency and safety in the procurement of resources.

EcoVadis is considered one of the world's leading institutions for evaluating corporate responsibility. In total, EcoVadis analyses the sustainability management of more than 150,000 companies worldwide in terms of the environment, labour and human rights, ethics and sustainable procurement. Only the most sustainable 1 per cent of companies are awarded a platinum certificate. The current platinum certification is already the fourth top award for Jungheinrich.
