

Electric pedestrian pallet truck

EJE M13 / M15

Lift height: 120 mm / Load capacity: 1300-1500 kg

Accomplished helpers in confined spaces.

Our lightweights for the reliable transport of goods.

The cost-effective and compact EJE M13 / M15 offer optimal support for the transport of lightweight to moderately heavy goods in small and medium-sized enterprises. Thanks to their compact design, they impress with maximum manoeuvrability, especially in confined warehouse environments.

A powerful drive motor ensures cost-efficient goods throughput with low operating costs, while the truck's maintenance-free lithium-ion battery can be charged quickly and conveniently from any 230-V socket using the built-in charger.

Two sprung support wheels for stable cornering and a completely closed frame ensure a high level of safety when driving. The multifunctional tiller head with LCD display presents the most important operating data at a glance and offers a high level of comfort thanks to one-handed operation.

Use your data to your advantage.

Utilise the data from your trucks to save time, energy and costs and increase efficiency. Our Telematics box (ex works) provides you with a free fleet management starter package that can be flexibly expanded with various hardware and software components.

* In accordance with our warranty terms - see website for details.

All benefits at a glance

- Cost-effective entry-level truck for the transport of goods in confined spaces.
- High manoeuvrability thanks to compact truck dimensions.
- Built-in charger for flexible and quick charging.
- Support wheels for improved driving and cornering stability.
- Optional system enhancements for specific operating conditions.

Your Jungheinrich low-lift pallet trucks

for maximum customer benefits.

Efficiency

Maximum performance with the most efficient trucks.

The perfect combination of robustness and efficiency: thanks to the standard lithium-ion battery, our EJE M13 / M15 impress with their long service life, zero maintenance and a first-class energy balance.

Advanced drive technology

- Strong drive motor with high degree of efficiency and excellent energy management.
- Energy recovery through regenerative braking.
- Truck as per newest EN-1175 standard.

Standard lithium-ion technology

- Powerful lithium-ion battery.
- Flexible and fast booster charging ensures high truck availability.
- Cost savings due to up to 3 times greater service life in comparison with lead-acid batteries.
- No battery exchange and no maintenance of the lithium-ion battery necessary.
- Intelligent automatic switch-off after 30 minutes without use.

Safety

Best conditions for working safely.

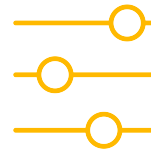

Every time you drive our EJE M13 / M15 electric low-lift pallet truck, a series of safety precautions ensure that the risk of injury to the operator is reduced to a minimum.

Optimum stability and high ride comfort

- Support wheels for excellent driving and cornering stability.
- Fully enclosed frame for maximum protection.
- Simplified manoeuvring in confined spaces by operating the slow travel button with the tiller in the upright position.
- 4-digit PIN access code in the tiller for increased ease of use.
- The truck can only be moved when the mains plug of the built-in charger is inserted in the specified socket on the truck.

Reduced risk of injury

- Reduced risk of foot injuries thanks to low ground clearance.
- The body protection switch integrated in the tiller head protects against collisions in dangerous situations.
- The long safety tiller provides sufficient distance between the operator and the truck.

Individuality

A forklift truck as individual as your business.

Whether in the pallet warehouse or for deliveries in the heart of the city – use various options and packages to perfectly adapt your truck to specific operating conditions.

Safe, intuitive operation

- Dual-sided operation of ergonomic, multifunctional tiller handle.
- LED real-time display of the most important truck operating data such as travel speed, battery status, operating hour counter and operating status display enables cost-effective work.
- Simple to operate for left and right-handed people.

Optional additional equipment

- The available City option with increased ground clearance and larger fork width is ideal for working in inner city areas as well as in tight spaces.
- Thanks to the sound insulation mat and tri-load tyres, the noise level of the truck can be reduced up to 60 dB in residential areas.
- The weighing system can be used wherever goods must be weighed and transported at the same time. Thus, two work steps can be efficiently accomplished with only one truck.

Overview

The right solution for your applications:

Name	Load capacity/ load	Lift height (max.)	Travel speed unladen	Aisle width (pallet 800x1200 length)	Lift speed unladen
EJE M13 (540x1,150)	1300 kg	120 mm	5 km/h	1843 mm	0.06 m/s
EJE M13 (550x1,150) with weighing function	1300 kg	120 mm	5 km/h	1863 mm	0.06 m/s
EJE M15 (540x1,150)	1500 kg	120 mm	5 km/h	1843 mm	0.06 m/s
EJE M15 (550x1,150) with weighing function	1500 kg	120 mm	5 km/h	1863 mm	0.06 m/s
