## **Jungheinrich's EJC 112i receives the highest honour at the Red Dot Design Award: 'Best of the Best'**

- **EJC 112i impresses jury with outstanding design concept**
- **Fully integrated lithium-ion battery with fast charging capability**
- **Compact design and high performance**

Hamburg – Jungheinrich's EJC 112i electric pedestrian stacker truck has won the 'Red Dot: Best of the Best' award 2025 in the commercial vehicle category. This highest honour in the field of product design recognises the outstanding innovative strength and excellent design of the EJC 112i.

The EJC 112i by Jungheinrich impresses with its compact design and advanced lithium-ion technology, which enables high performance and efficiency. With a load capacity of 1,200 kg and a lifting height of up to 4,700 mm, the electric pedestrian stacker truck sets new standards in material handling. With 92 out of 100 possible Red Dot Winner Points, it has secured the coveted quality label for pioneering design and impressive product quality.

The EJC 112i offers numerous advantages that make it an outstanding product: Thanks to its narrow working aisle width and sneak drive function, the EJC 112i is particularly agile and easy to manoeuvre. The long safety shaft ensures sufficient distance between the operator and the vehicle. The powerful three-phase AC traction motor and proportional hydraulics enable sensitive lifting and two-stage lowering. Optional features include an integrated charger for easy charging at a 230 V socket and a 2-inch display to show the battery charge status, operating hours and notification messages.

"We are delighted that we once again succeeded in convincing the jury of the Red Dot Award of the innovative spirit and design quality of our products", says Till Muhl, Head of Industrial Design at Jungheinrich. "Passion for every detail and enjoyment of the product

turn a task into something special. Our in-house design team has stood for this for many years. My heartfelt thanks go to everyone involved."

The Red Dot Award has been honouring the world's best and most innovative products in over 50 categories since 1955. Every year, an international jury of independent experts from the fields of design, science and journalism selects the products that stand out in terms of their design quality from multiple thousand submissions. Best of the Best is the highest award of the competition and goes to pioneering designs.
