

Electric pedestrian stacker

EJC M10 E / M10b E

Lift height: 1540-1900 mm / Load capacity: 1000 kg

The flexible entry model for easy stacking.

Manoeuvrable help for low-intensity operations.

Our compact and affordable EJC M10 E / M10b E electric pedestrian stackers are ideal for the stacking and removal of light goods in confined environments. Two different lift heights offer flexibility in use, while the optionally available wide-tread version is the perfect choice for picking up closed pallets.

A brushless DC motor ensures consistently high performance. The built-in charger enables fast and uncomplicated charging of the maintenance-free 50-Ah lithium-ion batteries at any 230-V socket.

The narrow mono-mast and the low frame height offer a clear view to the front as well as of the load to be transported. An ergonomically sophisticated tiller head with clearly configured controls ensures safe and comfortable working.

Use your data to your advantage.

Utilise the data from your trucks to save time, energy and costs and increase efficiency. Our Telematics box (ex works) provides you with a free fleet management starter package that can be flexibly expanded with various hardware and software components.

* In accordance with our warranty terms - see website for details.

All benefits at a glance

- Entry-level truck for the internal transport of goods.
- Excellent manoeuvrability in confined warehouse areas.
- Versatile use thanks to integrated lithium-ion battery and built-in charger.
- Innovative tiller design for efficient, one-handed operation.
- Modern display with integrated warning lights for intuitive operation.

Your Jungheinrich stacker truck for maximum customer benefits.

Efficiency

Solid performance with our efficient trucks.

Benefit from high availability and short charging times with our maintenance-free lithium-ion technology. Thanks to the built-in warning light, you are always well informed about the current truck and battery charging status.

Reliable lithium-ion technology

- Maintenance-free 50-Ah lithium-ion battery with long service life.
- Built-in charger for fast charging at any standard 230-V socket.
- Warning light informs in good time when the state of charge is too low.
- No battery exchange necessary.
- Intelligent automatic switch-off after 30 minutes without use.

Multifunctional tiller head for efficient work

- 2.4-inch LCD display in the tiller head to indicate the current truck status.
- Real-time display of travel speed, battery discharge status, operating hour counter and status messages for efficient work.
- 4-digit PIN access code in the tiller for convenient and reliable switching on of the truck.

Safety

Good requirements for safe working.

Not only safe, but also comfortable: as a substitute for the key switch, the PIN code ensures that only authorised personnel are able to drive the industrial truck.

Working safely in confined spaces

- Simplified manoeuvring in confined spaces by operating the slow travel button with the tiller in the upright position.
- Optimum view of the fork tips thanks to the low frame height.
- The truck can only be moved when the mains plug of the built-in charger is inserted in the specified socket on the truck.
- Jungheinrich truck as per the latest EN 1175 standard.

Reduced risk of injury

- Body protection switch integrated in the tiller head protects the operator from collisions.
- The long safety tiller provides sufficient distance between the operator and truck.
- Reduced risk of foot injuries thanks to low ground clearance.

Individuality

A forklift truck as individual as your business.

Lifting, lowering, braking, accelerating – with our versatile EJC electric pedestrian stackers you can enjoy maximum comfort, because all truck functions can be easily operated with one hand.

High flexibility in use

- Available with the lift heights 1,540 mm and 1,900 mm.
- The support arm width of the wide tread version of 882 mm and 1,052 mm can be optionally adjusted via an adapter.
- Activation of a slowed drive mode (3.5 km/h) via the PIN code field in the tiller.

Intuitive operation

- LED display of the current truck operating status in the tiller head for cost-effective working.
- The most important functions – lifting, lowering, accelerating, braking and steering – can be controlled via one-handed operation.
- Easy accessibility of the slow travel function for manoeuvring with the tiller upright.
- Simple to operate for left and right-handed people.

Overview

The right solution for your applications:

Name	Load capacity/load	Lift height (max.)	Travel speed unladen	Aisle width (pallet 800x1200 length)	Lift speed unladen
EJC M10 E 1900	1000 kg	1900 mm	5 km/h	2059 mm	0.22 m/s
