

ETV 3i series

YOUR TRUCK.
YOUR FIT.

Your reach truck from Jungheinrich.
Just as much power as you need.

 **JUNGHEINRICH**

Discover the high-performance partners for your warehouse.

Our ETV 314i–325i reach truck series is highly versatile and easily handles even the toughest tasks. With cutting-edge lithium-ion technology, the highest safety standards and Jungheinrich's renowned quality, it's the perfect fit for your operations.

Increased lifting and load capacity

Heavy loads and towering lift heights? No problem for the ETV 3i series. They quickly and precisely store and retrieve goods, efficiently moving pallets for order picking.

- Perfect for **medium to heavy-duty** applications.
- The ETV 314i, 316i, 318i, 320i and 325i models handle loads of up to **1,400 kg, 1,600 kg, 1,800 kg, 2,000 kg and 2,500 kg**.
- Reach lift **heights of up to 14,000 mm**.

Powerful battery performance

Our reach trucks are powered by advanced lithium-ion batteries – sustainable, energy-efficient and perfect for round-the-clock operation.

- Choose between **460 Ah and 690 Ah** battery capacities.
- Enjoy **exceptionally fast charging times**.
- Consume **up to 20% less** energy than lead-acid batteries.

Optimised additional features and work environment

Performance-boosting options refine operations, while safety and assistance systems provide maximum protection. An ergonomic workspace and an optional entry step add to operator convenience.

- **loweringPRO** option increases lowering speeds for faster operations.
- The compact battery design offers **maximum freedom** of movement for the driver.
- Improved **all-round visibility** and **intuitive controls** make work easier.
