Jungheinrich receives SupplyTech Breakthrough Award 2025 for outstanding analytics expertise

Hamburg – Jungheinrich's Warehouse Management System (WMS) has been honoured as "Overall Analytics Solution of the Year" at the prestigious SupplyTech Breakthrough Awards. The international jury recognised Jungheinrich's innovative strength and technological excellence in the field of data-based supply chain solutions.

The award-winning Jungheinrich WMS and the Data Centre module impressed with their holistic approach: The WMS not only ensures transparent, efficient and sustainable warehouse processes, but also supports warehouse employees in their daily tasks using integrated AI technology.

Dr Martin Weiglhofer, Head of Warehouse Management Systems / Managing Director, Jungheinrich Systemlösungen GmbH, says: "This award confirms our claim at Jungheinrich to actively shape the future of material handling with intelligent, data-based solutions. Our WMS is a central component of our customers' digital transformation – flexible, intelligent, and future-proof."

The annual SupplyTech Breakthrough Awards programme recognises the most innovative products, companies and people in the global supply chain technology and logistics industry. Jungheinrich's WMS and Data Centre module were selected from over a thousand international submissions. The award is based on a multi-stage evaluation process carried out by an independent jury. Each submission is judged based on the criteria of innovation, performance, user experience, functionality, market impact, and added value.

About the Jungheinrich WMS

The Jungheinrich Warehouse Management System manages and controls the entire internal material flow in the warehouse and thus ensures sustainable and efficient processes regardless of the industry. As the world of material handling is constantly evolving, the Jungheinrich WMS never stays the same. For more than 30 years, the in-house software and logistics experts have identified new material handling trends, such as artificial intelligence, and translating them into smart functions. The forward compatibility of the Jungheinrich WMS also makes it possible to switch to the latest version at any time and thus benefit from the latest functional developments – all while retaining the customer-specific parameters.
