

Electric pedestrian stacker with support arm lift

EJD 118i

Lift height: 1000-1520 mm / Load capacity: 1800 kg

Technical diagram of a mobile robot arm. The diagram shows the robot's base, a vertical mast, and a two-jointed arm with grippers. Dimensions are labeled as follows:

- h_1 : Total height from the ground to the top of the mast.
- $h_{14 \text{ max.}}$ and $h_{14 \text{ min.}}$: Heights from the ground to the grippers in their maximum and minimum extended positions.
- h_2 , h_3 , h_5 , and h_{13} : Various vertical dimensions on the right side of the diagram, representing different levels and offsets.
- l : Horizontal distance from the mast to the end of the arm.
- x and c : Horizontal distances from the mast to specific points on the arm.
- Q : A downward force or weight applied at a point on the arm.
- m_2 : A horizontal distance from the base to a point on the ground.
- y : Horizontal distance from the base to the end of the arm.
- l_1 : Total horizontal distance from the base to the end of the arm.
- s : A small vertical offset at the top right.
