Storage of long goods
Cantilever racking

JUNGHEINRICH

Cantilever racking
for long goods storage.

Remain flexible and maintain an overview at all times.

When you need to store bars, pipes or panels, you want quick and easy access at all times. This is precisely what cantilever racking was developed for. It comprises racking uprights and cantilever arms (= that come forward) to safely accommodate long goods of all weight classes and lengths. Optional roll-away protection provides an additional safeguard for the goods. Each racking upright is equipped with multiple cantilever arms, the number and spacing of which is tailored to the weight of the goods stored. The ability to extend as required means you can stay flexible. Want to store goods of different lengths or even pallets on the same racking? There's the option of connecting the cantilever arms using galvanised mesh or shelving. Movable racking can also be used to create additional space.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Can be extended as required
- Fast adaptation to changes in product ranges
- Direct access to all goods
- Mobile solution to gain even more space
- Also suitable for outdoor use

Your Jungheinrich racking
for maximum customer benefits.

Flexibility

Racking as individual as your business.

The racking has cantilever arms to accommodate goods of any length. Galvanised mesh can be installed to store combinations of long goods and pallets.

Versatile
- Can be expanded to form modular racking with additional flooring or pallet racking with galvanised mesh.

Individual configuration possible
- One-sided and two-sided versions available.
- Can be extended as required.
- Wide range of accessories.

Efficiency

Everything you need for optimum material flow.

Bulky long goods can be stacked in a small space and at height using cantilever racking. It enables you to use the space in your warehouse intelligently and efficiently – including outdoors.

Optimum space utilisation
- Perfectly adapts to the goods and area.
- Extra space gained when implemented as a mobile racking system.

Efficient outdoor use
- Versions with trapezoidal sheet metal roof for protection against wind & weather.
- Complete side panelling possible.

Adaptability
- Quick changes to height adjustment possible.
- Can quickly adapt to changes in range.

Safety

Best conditions for working safely.

Our preventive services and the appropriate racking accessories ensure that people, trucks and racks all stay safe – in every situation. So your processes can keep flowing and your capital goods remain protected.

Conformity with standards
- Racking system is designed according to the applicable standards.

Safety accessories
- Roll-away protection prevents loads from falling off.
- Bumper for protection of people and machinery.

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
