Mobile IT terminals / mobile computing

 JUNGHEINRICH

Mobile IT terminals / mobile computing for every purpose.

With mobile data acquisition for maximum flexibility.

With our diverse and modern selection of mobile computers, your employees will always have access to the information and applications they need in the warehouse, directly on the truck or from the device they are carrying. Arrange an individual consultation to find out which mobile terminals are best suited to your logistics environment.

Whether small devices in pocket format, large devices with a long scanning range or sturdy tablets, all industrial handhelds and tablets from Jungheinrich are equipped with the latest computer architectures and scanning units – for maximum performance in every application.

Increase the efficiency of your processes by working independently of location and mains power supply. All the devices will enable you to benefit from robust quality, advanced ergonomics and trouble-free connection to your system.

All benefits at a glance

- Mobile terminals for order processing and collection.
- Reliable real-time item identification with integrated bar code scanner.
- Touch screen or flexible keyboards for optimum operation.
- Various form factors for every application.
- Utmost reliability and durability.

Your mobile Jungheinrich IT terminals for maximum customer benefits.

Efficiency

Maximum performance with the most efficient tools.

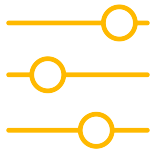

With the right combination of software and hardware components, we ensure that the battery power of your mobile IT terminals does not run out at a crucial moment, but offers full power even for multi-shift operation.

Long battery life

- Powerful batteries for maximum reliability and durability.
- Optimum system integration with low power consumption at the same time.

Diverse form factors

- Industrial smartphones with professional scanning unit carrying in a pocket.
- Conventional handhelds with or without handle and long scanning range.
- Robust tablets with large displays for mounting on trucks and mobile applications.

Individuality

A tool as individual as your business.

Whether you want modern tools with touch screens or mobile devices with physical keyboards – we equip your employees' working environment with custom solutions for mobile order processing and entry.

Individually configurable

- Tablets loaded with the most current versions of Windows or Android.
- Customised scanning units for long distances or the smallest bar codes.
- Optionally integrated cameras for documentation.
- Selection of the memory sizes for individual requirements.
- High-resolution touch displays and various keyboard layouts.

Flexible and efficient

- Pre-installed tools for quick commissioning and protection.
- Selection of standard logistical applications for data acquisition and management.
- Latest Android versions with long-term updates and support.
- A wide range of accessories in the form of brackets, cases, charging stations and cables.

Safety

Best conditions for working safely.

Robust quality and a high level of comfort: the harsher the working environment, the more robust the design of your mobile computer needs to be. With our devices, we always ensure that robustness is never at the expense of working comfort.

Robust quality

- Reliable in any environment.
- Shockproof and splash-proof.
- Can be used in temperature ranges between –10°C and +50°C.

Customised service and support

- Planning, commissioning and support from a single source.
- Different service levels for maximum performance and high availability.
