

System components

Label printers

or on the truck.

Label printer for any need.

Our sturdy and reliable industrial label printers are suitable for a wide range of applications in the warehouse. Whether it is labelling warehouse racking, printing shipping labels, small print runs or large print volumes of up to several thousand labels per day -- we offer you a wide selection of printers in different models.

Industrial printers for high, fast print throughput, small workplace devices such as shipping label printers at goods issue or mobile labelling devices for the flexible application of bar codes to all items, wearing on a belt or permanently mounted on the truck.

Our devices use thermal printing for long-lasting printing results that are resistant to light and temperature. The label printers can be connected to your network by radio or by cable using standardised communication languages.

All benefits at a glance

- Industrial printers for demanding environments.
- Suitable solutions for storage locations, goods or shipping labels.
- Manual, automatic or mobile device models.
- Individual consultation on printing technology and form factors.
- Utmost reliability and durability.

Your Jungheinrich label printer

for maximum customer benefits.

Efficiency

Maximum performance with the most efficient tools.

Do you want to print labels for your business with maximum cost and time efficiency? Our high-performance devices impress with their particularly fast label output with print speeds of more than 300 mm/s.

Needs-based selection

- Industrial printers for high and rapid throughput.
- Workplace devices for small space requirement.
- Mobile printers for on-site labelling on the truck or portable version for maximum flexibility.

Safety

Best conditions for working safely.

Whether manual, automatic or mobile – all label printers in our range are extremely sturdy and durable. This means they can easily withstand harsher conditions and intensive applications in large warehouses.

Long-lasting components

- Soft rubber feet for reliable stability with stationary devices.
- Optional service contracts with optimum availability of spare parts.

Robust quality

- High-quality design for harsh and demanding environments.
- Easy cleaning and quick roller change.
- With rewind device for liner material.

Individuality

A tool as individual as your business.

Benefit from customised solutions for your label printing: with first-class print quality, individual configuration options and needs-based equipment for your warehouse requirements.

Individually configurable

- Selection of print resolution and output type, e.g. with cutter.
- Modern displays for status monitoring or controlling the print output.
- A wide range of connectivity options: Ethernet, Wi-Fi, Bluetooth, USB, serial.

Various printing technologies

- Direct thermal printing without ribbon for compact printers and short duration, e.g. for shipping labels.
- Thermal transfer printer for long-lasting versatile use.
- RFID printer for intelligent tags.
- Selection of the right labels for all environments and purposes.
