

The ETV 4i series

YOUR TRUCK.
YOUR PERFORMANCE.

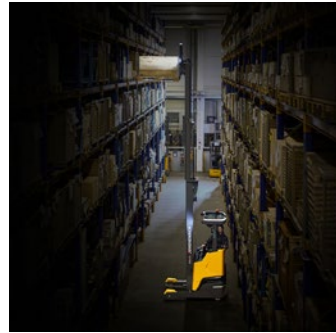

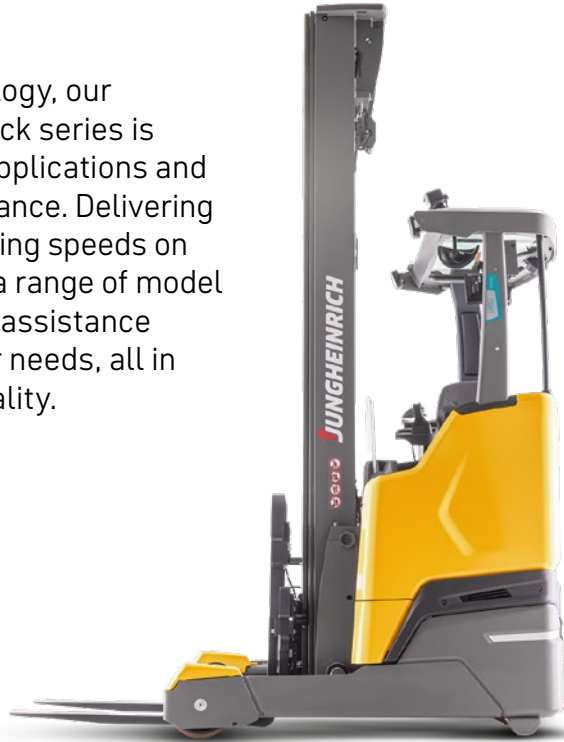

Your Jungheinrich reach truck.
Just as much power as you need.

JUNGHEINRICH

Bring peak performance to your warehouse.

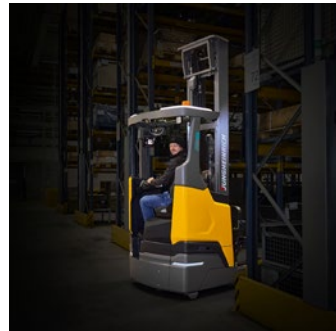

With lithium-ion technology, our ETV 414i–425i reach truck series is designed for intensive applications and higher handling performance. Delivering the fastest lift and lowering speeds on the market, it combines a range of model variants with intelligent assistance systems tailored to your needs, all in proven Jungheinrich quality.

Maximum handling performance

The trucks in the ETV 4i series combine high load capacities with impressive lifting heights, delivering up to 20% more handling performance than the competition.

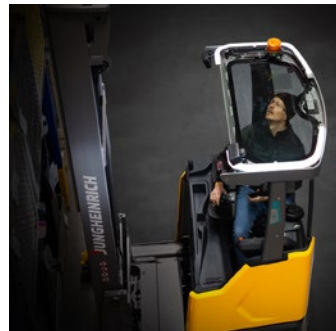

- Ideal for **intensive applications**.
- The ETV 414i, 416i, 420i and 425i models lift loads of up to **1,400 kg, 1,600 kg, 2,000 kg or 2,500 kg**.
- Store and retrieve loads at **heights of up to 14,000 mm**.
- Double your lifting and lowering speeds with the standard **liftingPRO** and **loweringPRO** functions, and increase reach speed with **reachPRO**.

High availability

The energy-efficient lithium-ion batteries offer **fast and opportunity charging at any time, keeping your trucks reliably ready for use, even in two- or three-shift operation.**

- Choose from battery capacities of **460 Ah or 690 Ah**.
- Benefit from extremely short charging times and a space-saving battery design.
- Reduce your energy consumption by around 20% compared with lead-acid batteries.

Modern assistance systems

Intuitive operation, improved all-round visibility and an entry step create the basis for comfort and safety in daily operation. Additional assistance systems support precise load handling.

- The **addedVIEW Positioning camera system** with three cameras gives operators an excellent overview.
- **Automatic fork centring** ensures smooth handling when lowering.
- **Optional active mast vibration damping** increases stability in operation and makes precise working easier.
