

Small parts storage static

High-bay shelving

 JUNGHEINRICH

Modular high bay racking

as high as the hall ceiling.

For maximum picking performance when using the entire room height.

If you want to store many different small parts in a very confined space, utilise the entire height of your hall with modular high-bay racking. As a picking warehouse for smaller packing units, it is the ideal addition to the narrow-aisle warehouse for pallets, as it can be operated with the same truck. The comprehensive range of accessories and the simple components enable tailored adaptation to your goods. Thanks to the boltless system, the height of the racking is adjustable, with heights of more than 14 metres being possible in high-bay warehouses. This means that high capacities are possible even with a small footprint. The operation is carried out in perfect coordination with our EKS medium / high level order pickers. We provide you with racking and order picking equipment from a single source.

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Quick access to any item
- Wide range of accessories for high adaptation capability
- Excellent utilisation of space
- Easy to assemble
- A perfect duo in combination with our EKS trucks

Your Jungheinrich racking for maximum customer benefits.

Flexibility

Racking as individual as your business.

Modular high-bay racking is suitable for a large number of goods, applications and industries. The components available and the comprehensive range of accessories allow the racking system to be customised to adapt to changes in space and utilisation requirements.

Modular functionality

- Flexible adjustment of shelving height at 25 mm increments.
- Variable adjustment to suit goods, e.g. via compartment dividers or recesses for bulk goods.

Individual sector solutions

- Advice from experts with sound sector experience.
- Tailored solutions for various sectors, e.g. grocery sector, wholesale, production industry and many more.

Efficiency

Everything you need for optimum material flow.

Modular high-bay racking allows full use of a room's height. This means greater capacity can be achieved with the same footprint.

Efficient working

- Quick access to any item.
- Perfect organisation and arrangement of items.
- High picking performance by using our EKS medium/high level order pickers

High utilisation of space

- Implementation as high-bay racking for efficient use of a room's height.

Safety

Best conditions for working safely.

Our preventive services and the appropriate racking accessories ensure that people, trucks and racks all stay safe – in every situation. So your processes can keep flowing and your capital goods remain protected.

Conformity with standards

- Our modular racking is designed according to applicable standards.

Safe setup

- The simple boltless assembly ensures a safe setup.
