MANITOU'S PARTS PRESENCE IN AUSTRALIA

With a heritage of supplying materials handling products to the Australian market since the 1970's and a vast range of products and solutions to meet customers' needs, keeping up with support is no easy task. But if you think we don't stock parts then read this article...

If you believe "holdings" only count if they are sitting in a single, centralised warehouse in a capital city, you're looking at the wrong map. At Manitou, we've traded the outdated "one big shed" model for a decentralised powerhouse of local availability.

The Power of the Network

The reality is that our exceptional dealer network holds a massive inventory right now, sitting in branches closer to the customer than any centralised warehouse could ever be.

While a single central hub might look impressive on a corporate brochure, it means nothing when a machine is down in the Pilbara or the Riverina. We've empowered

our dealers, from single site operations to Multi branch franchises, to be the primary frontline for parts and service. This isn't a lack of presence; it is a strategic, nationwide saturation.

A Dual Approach to Uptime

Our strategy isn't just about having parts; it's about having the right parts in the right places. We take a dual approach to ensure maximum uptime:

- **Dealer-Held Critical Spares:** We work directly with our dealers to stock high-turnover attachments and critical maintenance items. This includes everything from common filters to complex assemblies like tracks for our RT range, often sourced locally to bypass international lead times.
- **Strategic National Backup:** Manitou Australia maintains its own stock of specialized components and the most common attachments to back up the network.

This collaboration ensures that when a customer needs a part, they aren't waiting for a truck to cross the Nullarbor; they are likely picking it up from a local branch they already know and trust.

Quality and Consistency

Busting this myth isn't just about volume; it's about the quality of the support. By utilizing our BtoB portals and integrated systems, we monitor usage and forecast needs based on the actual fleet in the field. When challenges arise, such as specific lead-time issues for newer models like the 1050RT, we don't just offer excuses, we coordinate with our APAC hub in Singapore and local suppliers to bridge the gap and keep the "Myth Busted".

The Verdict

The idea that Manitou doesn't have parts in Australia is a blueprint from a bygone era. Today, our holdings are measured by the strength of over 116 service points across the continent, each stocked with the inventory required to keep the Australian construction and agricultural sectors moving.

We don't just have a warehouse. We have a nation.

MANITOU GROUP PARTS

CELEBRATING 8 YEARS DOWN UNDER: THE EVOLUTION OF THE 1650RT

This year at Manitou Australia we celebrate the 8th birthday of a fan favourite and true workhorse of our compact equipment line up, the 1650RT track loader. Debuting in Australia as a Mustang in 2018, this machine has carved out a legacy of unmatched reliability and performance.

Many of our long-term Australian customers will remember this loader first arriving on our shores wearing the iconic Mustang colours and name. As Manitou Group embraced its rich 388-year manufacturing heritage, we proudly transitioned from Mustang to Mustang by Manitou and then finally into Manitou in late 2019. Today, the 1650RT remains a cornerstone of our earthmoving product range.

The Pioneer of the Adapted Chassis.

The 1650RT holds a unique place in our history as our first adapted track loader. Instead of building from the ground up as a dedicated rail tracked machine, we engineered the 1650RT by adapting the proven, heavy-duty welded chassis of the 1650R skid steer loader. This innovative approach allowed us to utilize common, reliable

components while providing a machine that operators familiar with skid loaders could easily transition to and ensure optimal after sales support across both styles.

For eight years, the 1650RT has proven its worth on Australian job sites through a combination of rugged durability and premium features including:

- **IdealTrax™ Automatic Track Tensioning System.** This system automatically maintains constant, proper tension during operation and releases it when the machine is turned off saving our customers significant time and money.

- **Exceptional Power and Tractive Effort:** Highest in the category.
- **Heavy-Duty Lifting:** The machine features a radial-style lift arm specifically strengthened to handle higher track loader loads.
- **Pilot Joystick Control:** Unlike electronic-over-hydraulic systems, these true hydraulic pilot controls offer industry-leading feel and responsiveness without the frustrating “dead band” effect.
- **Your Safety First:** Standard with a Level II ROPS/FOPS cab without the need for additional guarding which adds height and cost.

As we look back on the last eight years, from its early days as a Mustang to its current proud status as the Manitou 1650RT, we want to thank our Australian customers for making this machine a crowd favorite. Here's to many more years of pushing boundaries and moving earth with the 1650RT!

YOUR MANITOU NOW IN YOUR POCKET 24/7

Congratulations on your new Manitou! You've invested in a world-class machine designed for power and precision. To help you get the most out of your investment, we highly recommend installing the **myMANITOU** app on your phone.

We live in an era where people no longer just "go online", they live online. With 90% of mobile time now spent within apps, the smartphone has become the primary dashboard for our lives. Whether you are managing your finances, your home, or your business, you do it through your phone. It only makes sense that your most valuable work asset is right there with you.

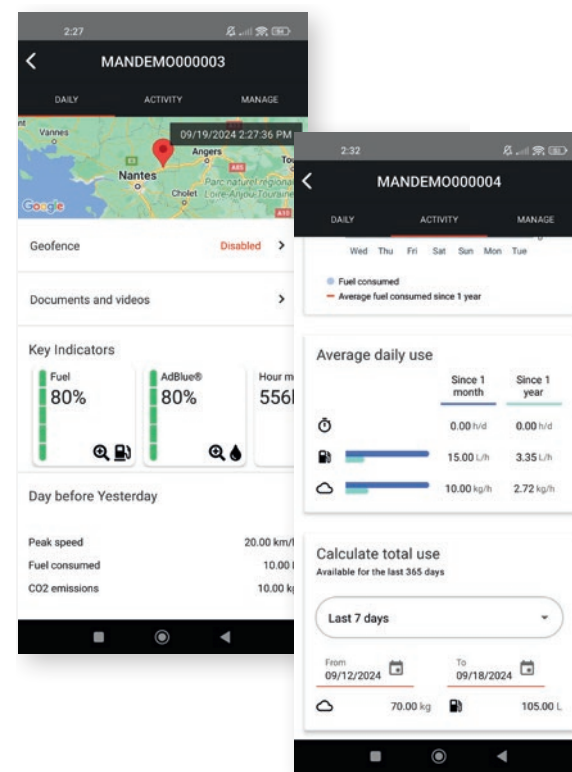

The **myMANITOU** app is your machine's digital heartbeat, providing a 24/7 connection to your equipment. Whether you are away from the site or farm, in a meeting, or on another job site, the facts you need are always in your pocket.

Constant Connectivity: 24/7 Visibility. The biggest advantage of the myMANITOU app is that it never sleeps. Even when the ignition is off, the app remains your eyes and ears on the ground.

- **Instant Level Checks:** Monitor Fuel and AdBlue® levels at midnight so you can arrange delivery for 6:00 AM.
- **Real-Time Location:** Know exactly where your asset is parked, giving you peace of mind that your investment is secure.
- **Battery Health:** For our electric range, monitor charging progress remotely to ensure you start the day at 100% capacity.

Advanced Access Management: The Right User, Every Time. Safety and accountability are paramount. The myMANITOU app gives you total control over who operates your machine and when.

- **Authorised User Profiles:** Ensure only trained, qualified personnel can operate your equipment. Manage permissions directly from the app.
- **Time-Slot Allocation:** Prevent unauthorised "after-hours" use. Set authorised working windows so the machine is only active when you say it is.
- **Full Accountability:** Maintain a digital log of who was behind the controls for safety compliance and internal reporting.

Proactive Maintenance & Reduced Downtime.

The app helps you shift from reactive repairs to proactive management, preventing small issues from becoming expensive failures.

- **Smart Maintenance Alerts:** Receive notifications for upcoming service intervals to schedule work during planned downtime.
- **Remote Diagnostics:** If a fault code appears, share it instantly with your dealer. Technicians can diagnose the issue remotely and arrive with the right parts, saving you hours of downtime.

- **Digital Library:** Your operator manuals are digitised within the app. The answer to any operational question is always in your hand.

Total Security with 24/7 Geofencing. Your Manitou is a high-value asset, and the app acts as a digital security guard that never takes a break.

- **Virtual Boundaries:** Set a "Geofence" around your site. If the machine moves outside this zone or is started during unauthorised hours, you receive an immediate alert.
- **Theft Prevention:** 24/7 monitoring significantly increases the chances of recovery and discourages unauthorised use.

Operational Efficiency & TCO. The app provides deep insights into your Total Cost of Ownership (TCO) by analysing how the machine is utilised throughout the day.

- **Usage Analytics:** Monitor idle time versus working time. This data helps you train operators to be more efficient, saving you significant money on fuel and engine wear.

- **Fleet Management:** If you own multiple units, the app aggregates your data, allowing you to compare the performance of different machines and coordinate logistics between sites seamlessly.

Why it matters: In today's market, "knowledge is power." Since we already spend our lives connected to our phones, having 24/7 access to your machine's telemetry means you are never making decisions based on guesswork. You have the facts, and the control, right where you spend your time.

Ready to get started? The myMANITOU app is available on the Apple App Store and Google Play Store. Simply download it, create your account, and link your machine using its serial number to unlock the full potential of your new Manitou.

Welcome to a smarter, more secure way of working. myMANITOU: The pulse of your machine, in the palm of your hand.

across Australia

124 Points of Sales
and Service

From the rugged Australian Outback to the rolling hills of New Zealand and the Pacific Islands, Manitou's expansive Oceania dealer network is right where you need us. From the smallest construction sites to the largest broad acre farm, maintaining your fleet with our factory-trained technicians, genuine spare parts, and dedicated local support ensures together we keep your equipment running at peak performance. No matter how remote, with our biggest footprint ever, you're never far from expert service

Wherever the work takes you, we've got you covered.

PEACE OF MIND

Maximize Performance and Safety: Choose Genuine Manitou Parts and Attachments

The Manitou Difference: Homologation for Guaranteed Performance

Unlike aftermarket alternatives, Manitou subjects each attachment and machine pairing to a rigorous, internal homologation procedure. This meticulous process guarantees:

- **Perfect Compatibility:** Every genuine Manitou attachment is designed and tested to work flawlessly with your specific Manitou machine.
- **Unbeatable Efficiency:** Optimized performance translates to increased productivity and reduced downtime.
- **Guaranteed Safety:** Our stringent testing protocols ensure the highest safety standards are met, protecting your operators and your investment.

Why Choose Genuine Manitou Parts and Attachments?

- **Expert Engineering:** Benefit from Manitou's extensive technical knowledge and practical experience.
- **Superior Quality:** Manufactured to the highest standards, ensuring durability and reliability.
- **Optimal Performance:** Maximize your machine's capabilities with perfectly matched components.
- **Enhanced Safety:** Trust in Manitou's rigorous testing and homologation procedures.
- **Peace of Mind:** By choosing genuine Manitou parts and respecting compatibility guidelines, you are ensuring the best possible lifespan and performance of your machine.

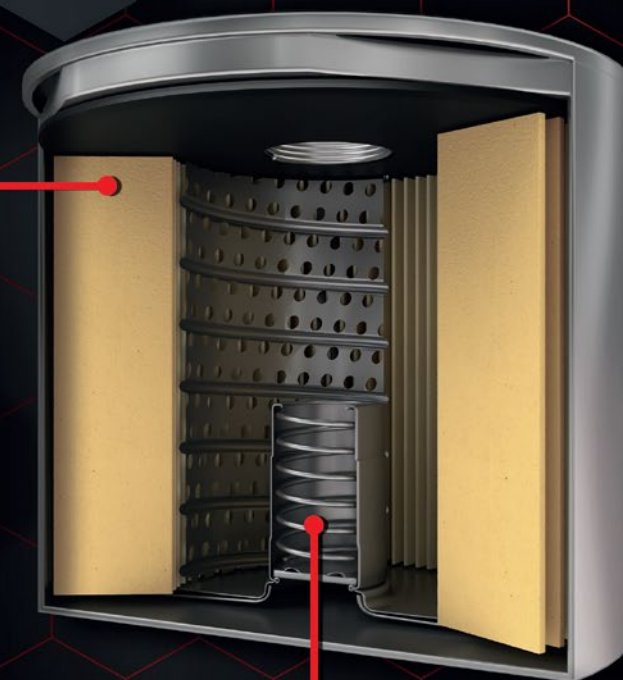

Don't compromise on safety or efficiency. Invest in genuine Manitou parts and attachments and experience the difference. Contact your local Manitou dealer today to explore our comprehensive range of genuine parts and attachments.

IT'S WHAT'S INSIDE that counts!

High quality media filter

- Retains impurities and ensures a purified oil
- Increases your machine lifetime

Quality and performance

- Perfectly compatible with your machine
- Adapted to the manufacturer's maintenance schedule

Specific Bypass

- Continuous lubrication in case of filter clogging
- Avoid unexpected breakdown of your machine

Insist on genuine filters!
