

Small parts storage static

Modular racking floor system

JUNGHEINRICH

Modular racking floor system

at all levels.

Utilise room heights and boost picking performance.

If you need to store lots of small parts, the warehouse space available is often insufficient. A modular racking floor system is recommended for this situation. It helps you make optimum use of the hall height and allows your employees to pick at multiple levels simultaneously. This increases your throughput. The multi-level system and the ability to pick at the upper levels saves you from having to use medium/high level order pickers. The steps make it easy to switch between levels. Hand pallet trucks and electric pallet trucks can be used to assist, and also forklift trucks for retrieving or removing palleted goods. The system has an extensive range of expansion and customisation options so that modular racking floor systems can be tailored to your industry, your site conditions and your performance requirements.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- More efficient use of room height through multiple levels
- Order picking at multiple levels for greater performance
- Short picking routes boost productivity
- Easy to assemble
- Maximum flexibility in throughput performance thanks to variable personnel deployment

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
