

Hand pallet truck

AM 30

Lift height: 120 mm / Load capacity: 3000 kg

JUNGHEINRICH

The robust hand pallet truck

for heavy goods.

Simple and safe handling with a standard fast lift.

The robust and particularly manoeuvrable hand pallet trucks AM 30 are ideal for the transport of heavy goods over shorter distances. Even with heavy cargo they remain surprisingly quiet and agile. This is made possible through their compact format and their particularly wide steering radius.

Chromed bushes on the wheels and joints make sure that pushing and pulling of heavy goods is possible without much force. The tiller head, too, ensures ergonomic and therefore safe working with its design that is intuitive and easy to operate for left- as well as right-handed operators.

Due to the hardened steel and the stable forks AM 30 move very heavy goods with ease. The especially enforced frame makes these hand trucks reliable companions in warehouses as well as on HGV. For the transport of goods with extreme centres of gravity a variety of fork lengths are available – individually adapted to your needs.

Approved
Jungheinrich quality

Proven quality by Jungheinrich

For decades, the Jungheinrich brand has been representing utmost reliability, premium-quality machines and comprehensive service whenever you need it. From hand pallet trucks to fully automated logistics systems – Jungheinrich delivers maximum quality.

All benefits at a glance

- Robust construction and innovative pump hydraulic system
- Time-saving fast lift for up to 120 kg
- Ergonomic tiller for right- and left-handed operators alike
- Flexible steering radius of 105° for best manoeuvrability
- Maintenance-free due to permanently lubricated connections

Your Jungheinrich hand pallet truck

for maximum customer benefits.

Efficiency

Maximum performance with the most efficient trucks.

With the standard fast lift cargo can be moved even more efficiently. Due to the special lowering valve cargo can be placed extremely precise.

Efficient Handling

- The fast lift (up to 120 kg) ensures that euro pallets can be lifted clear of the ground with just 3 pump strokes.
- The maximum lift height is achieved with only 5 pump strokes.
- Particularly sensitive and controlled lowering of goods with the special lowering valve.
- Optimised hydraulic system for effortless pumping.
- Drawbar pull required is reduced by the bushes on the wheels.
- Smooth controls equally suitable for both left-handed and right-handed operators.

Safety

Best prerequisites for working safely.

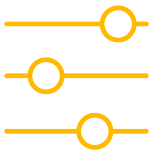

The particularly robust construction allows for the unhindered daily transport of heavy goods. Manoeuvrability and safety are at the centre of this design.

Safe and robust

- Enforced frame for the transport of heavy goods.
- Safe transport of goods with extreme centres of gravity due to adaptable fork lengths.
- Smooth manoeuvrability even in confined spaces or in HGV.

Maximum stability and durability

- Strong forks and contoured shapes.
- Welded tiller mounting.
- Protected entry rollers.
- Hardened steel.

Individuality

A forklift truck as individual as your business.

With or without special equipment – the very smooth running and maintenance-free exceptionally long service life convince in any situation.

Quiet running

- Chromed bushes on the wheels and joints ensure particularly quiet running and an exceptionally long service life.
- Excellent smooth running even without lubrication of the connections.

Overview

The right solution for your applications:

Name	Load capacity/load	Lift height (max.)	Aisle width (pallet 800x1200 length)
AM 30, 550x1220, V-BV, SH	3000 kg	120 mm	1803 mm
AM 30, 550x1600, V-BV, SH	3000 kg	120 mm	
AM 30, 550x1800, V-BV, SH	3000 kg	120 mm	
AM 30, 550x2100, V-BV, SH	3000 kg	120 mm	2683 mm
