

Electric ride-on/pedestrian pallet truck

ERE M20 / M25

Lift height: 122 mm / Load capacity: 2000-2500 kg

LI-ION technology

JUNGHEINRICH

The powerful all-rounder

for medium and long distances.

Reliability and comfort meet compact dimensions.

The flexible and powerful ERE M20 / M25 electric pallet trucks combine compact dimensions with individual comfort and operator safety. The trucks are robust, reliable, and increase efficiency during goods handling. When used in high-throughput warehouse areas, these all-rounders transport medium to heavy loads reliably and at high speeds.
The compact design with a reduced front-end length allows optimal warehouse space utilisation and superior manoeuvrability – without compromises on operator comfort. This is ensured by variable stand-on platforms, ranging from the foldable version to fixed platforms with side or rear entry.
The flexible battery concept allows to choose between lead-acid batteries or powerful lithium-ion technology – for maximum availability of the fleet.

Use your data to your advantage.

Utilise the data from your trucks to save time, energy and costs and increase efficiency. Our Telematics box (ex works) provides you with a free fleet management starter package that can be flexibly expanded with various hardware and software components.

No need to worry. No compromises

The Jungheinrich Li-ion Guarantee Plus provides you with a long-term performance promise of up to 5 years on our high-quality lithium-ion batteries, so that you can focus fully on your tasks without worry.

Warranty conditions

* In accordance with our warranty terms - see website for details.

All benefits at a glance

- High variance of stand-on platforms – the right solution for every requirement.
- Optimal operator protection and comfort thanks to three-sided protection on the fixed platform variants.
- Ergonomic, height-adjustable tiller for fatigue-free working.
- curveCONTROL for safety during cornering, even at high speeds.
- Lead-acid or state-of-the-art lithium-ion technology for increased performance and efficiency.

Jungheinrich pallet trucks

for maximum customer benefit.

Efficiency

Maximum performance through innovative technology.

Choose between classic lead-acid batteries or modern lithium-ion technology for maximum efficiency and increased vehicle availability – thanks to boost and opportunity charging.

Flexible battery concept

- High capacity and adaptability from 100 to 300 Ah for lithium-ion batteries and 230 to 375 Ah for lead-acid.
- Optional: powerful 70 A built-in charger for intermediate charging at any socket even in short breaks.
- High availability thanks to short charging times.

Optimised drive concept

- High acceleration and top speed.
- Enhanced driving performance and greater safety thanks to curveCONTROL.
- Regenerative braking with energy recovery.
- Smooth and precise handling thanks to the electric steering system.

Ergonomic solutions

- Fatigue-free operation thanks to the ergonomic, height-adjustable tiller with low steering resistance.
- Generous space with the side-standing design supports healthy, natural posture.

Safety

Highest safety standards for operators and goods.

The ergonomic stand-on platform ensures maximum protection while providing generous space for the operator. Intelligent assistance systems minimise the risk of injury and increase productivity.

Safe and ergonomic working

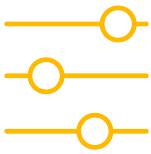

- Wide range of stand-on platforms with generous space.
- Maximum safety through three-sided protection on the fixed stand-on platform variants.
- Individual damping of the fixed stand-on platforms.

Intelligent assistance systems

- Optimised and safe cornering speeds thanks to curveCONTROL.

Robust, powerful design

- Robust steel chassis for demanding applications.
- 2-inch display with battery discharge indicator, operating hours, error display and three travel modes.
- Reliable electronic data transmission via CAN bus.

Individuality

Adaptability for every application.

With numerous customisation options, you can tailor the equipment to your specific needs – from efficiency boosts to additional safety features and ergonomic solutions.

Individually customisable

- Various stand-on platform variants meet individual requirements: foldable or stand-on platform with side or rear access.
- Various battery options – lead-acid or lithium-ion.
- Wide selection of battery capacities, tailored to all requirements.
- Short tiller in combination with fixed stand-on platform offers maximum safety and ergonomics.
- Height-adjustable tiller for perfect adaptation to the individual needs of the operator.
- Different fork lengths to suit every application.

Overview

The right solution for your applications:

Name	Load capacity/load	Lift height (max.)	Travel speed unladen	Aisle width (pallet 800x1200 length)	Lift speed unladen
ERE M20	2000 kg	122 mm	9 km/h	2299 mm	0.07 m/s
ERE M25	2500 kg	122 mm	9 km/h	2299 mm	0.07 m/s

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
