JUNGHEINRICH

# Vertical paternoster racking system

## for compact storage.

**Ergonomic and efficient for greater performance.**

Vertical paternoster racking systems function according to the circulation principle. Like a carousel, the items rotate towards the service opening, where they can be conveniently and safely removed by the operator. They can be tailored to your needs and enable high-density storage, be it in production or in the warehouse. The result is maximum storage space with a minimal footprint. Other benefits include high picking capacity and throughput speeds, with quick access to all items being possible. Vertical paternoster racking is useful wherever space or order-picking time is no longer sufficient with static storage. It can be connected to the Warehouse Management System through our Jungheinrich Logistics Interface at any time. It can be installed as free-standing carousel racking or connected to the structure of levels in the building, up to 10 metres in height and with multiple service openings. The latest safety technology and optimum ergonomics make vertical paternoster racking a reliable, user-friendly solution.

JUNGHEINRICH
RACKING COMPETENCE

### Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

### Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

## All benefits at a glance

- Rapid access to all stored goods thanks to high throughput speed
- Optimal use of space due to high-density warehouses and utilisation of room height
- Ergonomic design combined with extensive safety features
- The paternoster racking has an impressive service life due to its robust technology which has proven itself over many years
- Easy to connect to a variety of Warehouse Management Systems

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
