

Small parts storage static

High-bay shelving

JUNGHEINRICH

Modular high bay racking

as high as the hall ceiling.

For maximum picking performance when using the entire room height.

If you want to store many different small parts in a very confined space, utilise the entire height of your hall with modular high-bay racking. As a picking warehouse for smaller packing units, it is the ideal addition to the narrow-aisle warehouse for pallets, as it can be operated with the same truck. The comprehensive range of accessories and the simple components enable tailored adaptation to your goods. Thanks to the boltless system, the height of the racking is adjustable, with heights of more than 14 metres being possible in high-bay warehouses. This means that high capacities are possible even with a small footprint. The operation is carried out in perfect coordination with our EKS medium / high level order pickers. We provide you with racking and order picking equipment from a single source.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Quick access to any item
