Steel construction platform

JUNGHEINRICH

Steel construction platform

to gain space upwards.

Quickly and easily expand the capacity of your warehouse.

A structural steel platform is a quick way to gain additional space at height without having to make costly structural changes to the floor plan. The self-supporting, walk-on and optional drive-on steel construction creates space at multiple levels: When new storage and work areas are provided, the lower level can also be used for production, for example. Compared with integral mezzanine floors, structural steel platforms offer many individual design options. They can be used as picking platforms, for instance. Structural steel platforms can be designed so that not only hand pallet trucks but also electric pallet trucks can operate on them. Forklift trucks or conveyor systems provide the of material flow from the ground floor to the platform; personnel gain access via steps or integrated lifts.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Additional storage space without change in the building structure
- More efficient use of room height
- Flexible adaptation to existing needs
- Many individual design options

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
