

Pallet storage

Mobile racking

JUNGHEINRICH

Mobile pallet racking

for small spaces.

For the best use of space in various types of warehouse.

Aisles between rack units increase your space requirements. Mobile rack units are an effective solution and can achieve space savings of up to 90%. In this system, an aisle is opened by pushing apart the racks only where you need to gain access. The technology behind this: mobile racks that are mounted on electrically driven bases ("carriages"). Control is either centrally from the individual rack or via remote control. The space saved is of course available as additional storage space. This results in an extremely high utilisation of space. Simple operation ensures quick access to any item. Even larger trucks can be used without any problems, as only one aisle must ever be opened and therefore the size of the truck is not a critical factor in space loss. For use with pallet, modular and cantilever racking systems.

JUNGHEINRICH RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Optimum utilisation of space by reducing number of aisles
- Compact storage system reduces energy and operational costs
- Access to single location
- Time and energy savings due to shorter travel routes
- Can be flexibly extended
