

Pallet storage

Pallet live storage

JUNGHEINRICH

Pallet live storage

for FiFo method.

Greater efficiency for large quantities of identical pallets.

Our dynamic solutions are ideal when palleted goods need to be stacked and retrieved as quickly as possible. Pallet live storage is recommended when you operate using the FiFo method and want to move a large number of identical pallets. With this system, the stacked goods move forward automatically to the retrieval point. This goods-to-person method saves on unnecessary travel and the benefit is that the goods do not age. This makes pallet live storage ideal for transporting perishable goods with a short best-before date. The structure of the pallet live storage comprises racking uprights connected together to form a channel. One side is used for storing; the other side for retrieval. When a pallet is retrieved, the next one automatically moves along the slightly inclined roller conveyor. Brake rollers control the speed and an automatic separator makes sure that products don't get jammed.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance

- Optimum use of space with dynamic block storage
- Greater efficiency: Separation of loading and removal
- Shorter internal transport distances
- Time saved through goods replenishing automatically
- Monitoring of best-before dates and production series

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.
