

Pallet storage

Single-bay racking

JUNGHEINRICH

Single-bay racking

for pallet cages and heavy goods.

For optimum utilisation of space and direct access to all load units.

Single-bay racking is ideal for ranges with large quantities per item. Benefit from flexible solutions for the storage of heavy goods, possible with a maximum bay load of up to 45 tonnes. The accessible configuration of the load units means that the use of single-bay racking is always advantageous when order picking is done directly from the pallet or pallet cage. Operation can be manual or automatic – using either forklift trucks or stacker cranes. The depth supports ensure that the stacking operation is particularly fast and reliable. Direct access to all load units and secure stacking up to high lift heights are advantages for block storage. You also maintain flexibility when it comes to space: angle profiles arranged in the depth direction take on the support function, permitting extra space heightwise.

JUNGHEINRICH
RACKING COMPETENCE

Racking expertise since 1958

Racking is the backbone of your warehouse. We develop tailored solutions for every industry and every demand in order to meet the utmost quality requirements and to grow along with your needs. As a system provider, we are your single point of contact from planning right through to after sales.

JUNGHEINRICH
RACKING INSPECTION

Certified quality. Guaranteed

Even when your racking solution is up and running, we continue to ensure quality and safety levels in the warehouse. At your request, one of our 120 certified inspectors will visit your site to perform the annual inspection stipulated by DIN EN 15635. If something is amiss, the original spare parts will be delivered right away.

All benefits at a glance
