

Electric tow tractor

EZS 010

Towing capacity: 1000 kg

LI-ION technology

JUNGHEINRICH

The compact pedestrian tow tractor

with versatile applications.

Powerful thanks to lithium-ion power.

The EZS 010 is the compact entry-level truck for effortless towing of smaller loads over shorter distances and in confined spaces, indoors and outdoors and also on gradients. The electric tow tractor combines compact dimensions with convincing lithium-ion performance and high flexibility: The universal coupling enables all types of trailer and trolley to be docked, even those without a tiller. This makes the EZS 010 a flexible all-rounder that shows its strengths in numerous environments: in production, order picking, retail and as a last-mile solution. Booster charging of the lithium-ion battery is quickly possible at any socket. Alternatively, thanks to its low weight, the battery can be changed by hand in seconds. In terms of ergonomics, the EZS 010 scores points with the height of the tiller that can be incrementally adjusted, and a foot guard offers protection for the operator. In summary, it is the ideal truck for pedestrian mode as the transport of goods is made faster and more efficient.

Use your data to your advantage.

Utilise the data from your trucks to save time, energy and costs and increase efficiency. Our Telematics box (ex works) provides you with a free fleet management starter package that can be flexibly expanded with various hardware and software components.

Warranty conditions

* In accordance with our warranty terms - see website for details.

All benefits at a glance

- Powerful, maintenance-free lithium-ion battery.
- Compatible with all types of trailers and trolleys.
- Compact dimensions, also ideal for confined spaces.
- Versatile, flexible applications.
- With proven Jungheinrich Service for more durability.

Your Jungheinrich tow tractors

for maximum customer benefits.

Efficiency

Maximum performance with the most efficient trucks.

Increase your productivity and make it easier for your employees to pull trolleys and trailers.

With lithium-ion technology as standard

- High availability thanks to extremely short charging times.
- Fast booster charging or easy battery exchange for continuous operation.
- Cost savings due to longer service life and zero maintenance when compared with to lead-acid batteries.

Compact dimensions

- Compact dimensions facilitate easy manoeuvring. Perfect for use in confined spaces, e.g. narrow aisles in retail.
- Significantly faster and effortless compared with pulling by hand.

Safety

Best precondition for working safely.

Jungheinrich's forward-thinking safety concepts protect people and loads from potential hazards at all times.

Foot protection

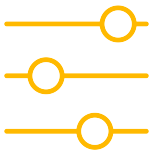

- To the left and right of the large wheels are foot guards to protect the operator from danger.

Safe manoeuvring

- The trolley or trailer is stopped safely without physical effort by the operator, even with heavier loads.
- Secured on gradients: Tow tractor is prevented from rolling down by automatic stop and always remains in safe reach of the operator.
- Large wheels for easy manoeuvring on uneven floors (kerbs) and outside.

Always informed

- Extensive display and setting instruments always provide a complete overview on the battery discharge status, operating hour counter, speed and error codes.
- Activation of the truck via PIN code.
- Adjustable drive parameters.

Individuality

A truck as individual as your business.

Electric tow tractors take a lot of work off operators' shoulders. Smart details and proven service round off the operating experience.

Universal interface

- We offer various universal couplings for the most common trolleys and trailers.
- Mechanical as well as electrical versions available.
- Individual couplings for all types of trolleys also possible.

Ergonomics

- The height of tiller position can be raised or lowered depending on the height of the operator.
- Fatigue-free and effortless work in comparison with the manual reaching of loads.
- Clear view of coupling at any time to keep connection to trailers in view.

Overview

The right solution for your applications:

Name	Rated drawbar pull	Travel speed unladen
EZS 010	200 N	4.9 km/h

The German production facilities in Norderstedt, Moosburg and Landsberg are certified as well as our Genuine Parts Center in Kaltenkirchen.

ISO 9001
ISO 14001

Jungheinrich fork lift trucks meet European safety requirements.
