# Forklift and Warehouse Accessories

2022/2023

JUNGHEINRICH

#### **Dear customer**

For more than 65 years, our Jungheinrich products and services have been making logistics hearts beat faster. Because we are driven by reliable intralogistics solutions that provide maximum performance and meet every challenge.

We also have high standards for quality and performance when it comes to our accessories. Often small adjustments can make a big difference.

Whether it is changed logistics processes, new occupational safety requirements or legal regulations - we have the solution. With original accessories from Jungheinrich, we offer you a wide range of products that can quickly and easily meet your individual warehouse and forklift requirements. They protect your employees, warehouse and goods, increase productivity and also save costs.

For enquiries and orders, please contact your Jungheinrich sales manager or use our webshop "Jungheinrich Parts Online".

We hope you enjoy browsing through it.

Your Jungheinrich Team

## **LED Warning Lights**

Hardly any other warning device is perceived as actively as the bright light of a warning light. Even in noisy warehouses or at a greater distance, they are clearly visible and indicate a potential source of danger. With early notification of safety hazards, employees can react promptly and avoid potential accidents. Benefits: early detection of dangers, avoidance of accidents during operation, reduce the risk of accidents and costs caused by damage and downtime, protection of danger areas, more security and protection for employees and equipment.

SYMBOLS LED WARNING LIGHTS

LED WARNING LIGHTS

## **Floor-Spot**

The Floor-Spot helps to avoid accidents at intersections and narrow corridors.

- ▶ Projects red or blue spot onto the ground. With a diameter of approx. 50 cm the point of the small version is almost three times the size of the regular Floor-Spot.
- The housing of the small version is almost a third smaller than the one onf the standard Floor-Spot and especially suitable for driver shelters where space is limited

| MATERIAL NO.            | COLOUR |  |
|-------------------------|--------|--|
| A Floor-Spot, 12 V-48 V |        |  |
| 51806570                | Blue   |  |
| 51806569                | Red    |  |

| MATERIAL NO.                   | COLOUR |  |
|--------------------------------|--------|--|
| B Floor-Spot Small, 12 V-110 V |        |  |
| 51684803                       | Blue   |  |
| 51684804                       | Red    |  |

## **Floor-Spot Arrow**

The Floor-Spot Arrow clearly indicates the direction of driving, even to slowly approaching vehicles.

- ▶ Projects a blue arrow on the ground
- Optical warning of dangers

MATERIAL NO.

51693298

COLOUR Floor-Spot Arrow, 12 V–110 V Blue

**80** 

## **Floor-Stripe**

The Floor-Stripe is a zoning light that projects a colored line on the floor, which clearly marks the boundary of a danger zone.

- Warns employees that increased attention is needed in the defined area
- Available in blue, red or yellow

| 12-36 V<br>MATERIAL NO. | 48-90 V<br>MATERIAL NO. | COLOUR |
|-------------------------|-------------------------|--------|
| Floor-Stripe            |                         |        |
| 51826542                | 51820971                | Blue   |
| 51826541                | 51820966                | Red    |
| 51831452                | 51820977                | Yellow |

## **Floor-Bow**

The Floor-Bow projects a clearly visible semicircle in front of or next to a danger zone.

- Easy and quick installation with universal bracket
- ▶ 360° solution possible (two mounted lights, front and back)
- Can be combined with additional lighting types

| د <sup>360</sup> ٹ |  |  |

| 51826884             | Green  |  |

## **Danger Zone Light**

Zone light for the visual indication of danger zones.

- The entire danger zone is effectively marked with a visible light
- Especially suitable for use on temporarily stationary vehicles, such as a scissor lift pallet trucks or defective forklift trucks

| MATERIAL NO.                  | COLOUR         |  |

## **Beacon Light/Flashing Light**

The LED Beacon Light and the Flashing Light are the classics when it comes to making work areas safer.

- Durable LED lighting with five adjustable modification levels
- ▶ 360° rotating cone of light ensures good visual
- Warns against sources of danger even from distance

| PRODUCT                                |  |  |  |
|--|--|--|--|

## **Collision Warning System**

Blind corners and intersections are a common hazard in most industrial settings. The Jungheinrich collision warning system helps to lessen these hazards.

- Sends a warning when it senses objects moving in both of its detection zones
- Visual and acoustical warning through flashing light and warning signal
- Regulation and deactivation of acoustic warning signal possible

| MATERIAL NO.             | SCOPE OF DELIVERY           |  |  |

## **Safety Bar for Forks**

The Jungheinrich safety bars are designed to reduce the likelyhood of injury thanks to improving the visibility of forks without a load.

- The beam is designed for forks with a tip thickness of 10 mm, 15 mm and 20 mm – and a maximum fork spacing of 580 mm, measured from outside edges of both forks
- ▶ Good visibility due to red and white colored hatching
- Fork tip plug-on on the inside and an additional slip protection allows a prompt and secure fastening

| MATERIAL NO.      | PRODUCT    |

| Safety Bar for Fo | orks       |
| 52014381          | Safety bar |

## **Shock Sensor**

Reduction of impact damage on trucks, racking, doors, gates and goods.

- Prevention of damage to personnel and equipment
- Sensor registers impacts and damages
- Emits an acoustic warning signal as soon as a specified threshold is exceeded
- It is also possible to additionally realise visual warning signals

| MATERIAL NO. | EQUIPMENT                                  |

| 51229267     | Starter set complete                       |
| 51229264     | Basic equipment for every additional truck |

#### **Camera Systems**

The Jungheinrich camera systems offer a versatile, costeffective and instantly applicable camera retrofit solution. All retrofit kits are equipped with powerful Li-Ion batteries and do not require control system integration. The individual components can be installed quickly and flexibly to the truck using a magnetic holder. For further efficiencies, selecting a Wi-fi/radio option eliminates additional material and installation costs. In addition, the cables and cable management components are no longer required, thus reduce costs due to wear and tear. The digital radio technology guarantees a delay-free and interference-resistant signal transmission.

- Increased efficiency through faster and more precise storage and picking
- Increased safety for personnel, machines, and storage equipment due to optimum visibility
- Increased driving comfort and improved ergonomics thanks to clear forward visibility over the load and safe backward navigation without having to constantly turn around
- All camera sets with Wi-fi/radio option for minimum installation effort and wear and tear
- All camera sets include long-lasting Li-Ion batteries and high-performance magnetic mounts for maximum flexibility and truck autonomy

For further details, please see the following pages.

#### **INSTALLATION TIPS**

All monitors are delivered with a "RAM-Mount" C ball. The device for installation in the driver's cab (e.g. the RAM mount socket arm) must be ordered separately. Information regarding mounting options can be found from page 44.

Additional small materials (cable ties, cable fixings, adhesive tape, etc.) may be required for compact installation of the wiring on the fork carriage and inside the driver's cab.

#### **EXTENSION TIPS**

The battery lifespan is normally approx. 8–10 hours. If the truck is utilised in a multiple shift, it is recommended to order an additional battery (Mat. No. 51725385).

All systems can be retrofitted with additional camera types. Please refer to the operating instructions for further information. On request, we will be happy to create a personalised solution for you.

# **Warehouse Safety**

Upgrade your operation with ram protection fixtures to protect your load, equipment and buildings. With the Jungheinrich barrier systems you can quickly and easily secure danger zones in your exterior and interior operations. Due to the clear marking of potential danger zones and effectively placed ram protection, you can avoid expensive downtimes and repair costs in your operation.

## **Steinbock® Impact Protection**

Reliable protection against collision damage in the warehouse.

- Compliant with safety guideline
   DGUV Regel 108-007 (ex BGR 234)
- Robust design made of 5 mm steel plate
- Warning colours ensure excellent visibility
- Available in 2 models: angle and U-profile

## **S-Line Collision Protection Railing**

Robust protection railing made of sectional steel.

- ▶ For clear separation of working areas
- Variable and expendable system consisting of support posts and cross bars
- Compact dimensions
- Quick and easy mounting
- ▶ Interlocking no protruding flaps or screws
- Base plate dimensions  $L \times W \times H$ : 140  $\times$  160  $\times$  10 mm
- Optionally available with SWING spring element and railing door

## **Impact Protection Crossbar**

To ensure smooth and safe workflows, transport and pedestrian routes in production halls and warehouses should be clearly separated. Impact protection railings for indoor use are an ideal solution in this case.

- Crossbar for impact protection railing system for indoor use
- Robust sectional steel for maximum durability
- Yellow plastic coating for enhanced visibility
- Easily expandable

 $\widehat{}$ 

- Optional: SWING spring element and railing door
- ▶ Incl. base plate for floor bolting,  $L \times W \times H$ : 200 × 200 × 10 mm

## **RackGuard Racking Leg Protectors**

With RackGuard the rack legs and uprights are effectively protected against lateral and frontal impacts. Thus, protect the racking from any significant consequential damages. The RackGuard is a standard feature in many Jungheinrich warehouse projects and can now be easily retrofitted and customized by Jungheinrich service.

- Optimal absorption and deflection of collision impact
- Low space requirement
- Easy and fast installation
- ▶ No mounting on the ground necessary
- Original Jungheinrich design

## **Rack End Guardrail**

Rack end guardrail systems provide reliable shock absorbing protection caused by turning vehicles and warehouse equipment. Created from an exclusive composition of sophisticated materials, expertly blended for high strength, durability and resistance. Designed to protect end of racking aisle and vulnerable racking structures.

- Special plastic with maximum impact absorption
- ▶ Rotating cuffs
- ▶ Simple installation
- Powder-coated floor panels

DUNGHEINRICH

## Bollard

Bollards can be used flexibly to protect the racking structure and equipment, e.g. in narrow corners or dangerous areas. In addition, their physical presence provides visual guidance and helps drivers and pedestrians navigate around critical warehouse areas.

- Extremely impact-resistant and flexible material
- Absorbs and reforms repeatedly upon impact force
- Suitable for both indoor and outdoor use
- Powder-coated floor panels

## Alarm Bar

The alarm bar effectively protects doors, gate frames, ceiling installations or cables from damage caused by extended masts or excessively high loads. Furthermore, damages to the forklift and other warehouse vehicles as well as the load are prevented. The alarm bar is mounted a few meters in front of the obstacle. If the truck touches the bar, a clearly audible alarm signal is emitted (102 dB). In addition, red LEDs lights emit optical flashing signals (68 lm/m). The perceived warning signals enable the driver to stop his truck promptly and lower the mast and/or reduce the load.

- Alarm bar with visual and audible warning signal
- Quick and easy installation
- ▶ Includes two nylon ropes of 1.5 m length
- Approximately 2 years battery life

## **Impact Protection Profiles**

- ▶ The impact protector can prevent damage to machines, vehicles and buildings
- Made from lightweight polyurethane foam
- ▶ The foam material is resistant to UV light and solvents
- ▶ Flexible, non-ageing and weather-resistant
- ▶ Temperature-resistant from -40 to +90 °C, with UL 94 flammability rating
- Can be easily cut to size, packaging unit 1 or 5 m
- According to DIN 4844 yellow/black

## **Barriers**

## **Steel Scissor Barrier**

- Scissor fence barrier can be extended to a width of 3.6 m
- High-quality steel makes it durable and stable
- Connecting brackets enable several scissor fences to be erected next to each other

## **BASIC Plastic Scissor Barrier**

- Scissor construction for straightforward expansion and retraction
- Easy transport thanks to low weight of just 2.6 kg
- ▶ Just 240 mm wide when collapsed
- ▶ Fillable feet for maximum stability

## Wall Belt Barrier

The wall belt barrier makes the blocking of routes efficient and quick.

- ▶ Wall belt for connection with screw-on wall clip
- Self-tensioning belt for optimal handling
- Wall clip made of heavy-duty plastic (accessories)
- Length 3 or 4 m
- Use belt connector (see accessories) to connect belts for blockings up to 8 m

## **Protection Rail**

Massive steel angle for protection of restricted areas and entrance areas.

- ➤ Highly robust: stops lift trucks, transport trolleys etc. thus decreasing repair costs
- Low construction (150 mm high) for unobstructed access to protected areas
- Mitre cut (45°) for angle mounting

## **PANORAMA All-Round Visibility Mirror**

The use of the panoramic mirror guarantees all-round visibility.

- PANORAMA all-round vision mirror made from impact-resistant acrylic
- Easy handling thanks to low weight
- Mounting kit for straightforward ceiling attachment
- Easy mounting screw directly on straight surface or use mounting kit for ceiling attachment (4 m knotted chain)

## **Protection of Goods**

Goods are exposed to damage risks both during transport as well as during storage and picking processes. Damages can be caused by contact with the forks and fork carriers, or if the load slips off the forks. The Jungheinrich accessories presented in this section help to reduce these risks and thus effectively protect goods from damage.

SYMBOLS PROTECTION OF GOODS

Noise damping

AD

Ĭ

Available colour

## **Fork Laser Guide**

The Jungheinrich Fork Laser Guide projects a clearly visible green laser line at the fork level, which facilitates a precise and swift control of the pallet. This small accessory can significantly increase throughput rates and reduce the risk of damage, especially in areas with poor lighting conditions as well as support inexperienced drivers. The fork laser guide includes two long-lasting Li-Ion batteries plus a charger and can be operated via height sensor or remote control.

- Prevention of damages to pallets and goods
- Simplifies storage and picking of loads
- Quick and easy retrofitting to the fork carriage: Plug & Play
- Automatic deactivation when not in use
- ▶ Robust design

| MATERIAL NO.                               | CONTROL                                      | COLOUR |  |

|--------------|---------------|
| 51927781     | Spare battery |

#### Flexible Bumper

The bumper can be used flexibly for mounting directly on the truck or on the back of the fork. The PVC material specially developed for the use on forklifts, absorbs the impact energy very effectively. The bumper comes with two magnets (45 kg capacity), double-sided 3M adhesive tape and mounting brackets for anti-slip attachment to the back of the fork.

- ▶ Effective absorption of impact energy
- Protection of goods, forklifts, and pallet loads
- Possible to bend up to 90 degrees for effective attachment on edges and corners

| MATERIAL NO.    | L×W×H (MM)        |

| 51729933        | 450 × 100 × 35 mm |

## **Magnetic Rubber Fork Covers**

The magnetic covers offer additional protection when transporting goods with a smooth surface. They reduce the risk of slipping and protect sensitive surfaces from damage.

- Effective prevention of slipping of goods
- Quick and easy installation
- ▶ Noise absorption
- ▶ Secure adhesion to the forks
- Resistant to abrasion, chemicals, and oils

## **Fork Tip Protector**

Protective caps for fork tips.

- Protection of fork tips
- Reduction of goods damage

| MATERIAL NO.       | WIDTH (MM) |  |
|--------------------|------------|--|
| Fork Tip Protector |            |  |
| 51822407           | 100        |  |
| 51822409           | 125        |  |

#### **Fork Protection**

The magnetic fork shank protection made of polyurethane, effectively protect goods and pallets from damage during loading.

- Damage protection to goods and pallets
- Quick and easy assembly with magnets
- ▶ Noise absorption
- Vibration reduction
- Abrasion and cut-resistant

| MATERIAL NO.    | L×W×H (MM)    |  |
|-----------------|---------------|--|
| Fork Protection |               |  |
| 51710041        | 430 × 70 × 30 |  |

#### **Fork Carriage Protection**

Magnetic bumpers for the fork shank.

- Absorbs shocks that can occur during the lifting, loading and placing of pallet loads
- Protects goods as well as the back of the forks

| MATERIAL NO.             | L×W (MM)  |  |
|--------------------------|-----------|--|

| 51822446                 | 900×150   |  |

## **Seats**

Due to uneven ground, undamped impacts can have a negative effect on your driver. Our high quality seats help to effectively reduce these vibrations. On top of this, you will profit from maximum seating comfort, due to the perfectly ergonomic design and the extensive additional features such as seat heating, lumbar support and the seatback extension.

## **Maintenance Products**

Keep your forklift in good shape. Chains and other moving parts should always be greased, even in between the regular maintenance intervals. This ensures a smooth movement flow. With our Jungheinrich paint products, you can easily touch up small transportation damages and scratches. Your forklift will look brand new.

#### **KEEP IN MIND**

Battery charging stations have to fulfil certain safety feature components according to the given safety requirements (DIN EN 50272). Everything on hand for your maintenance and in case of emergencies.

Optionally, the battery service board can be supplemented with safety signs, acid protection aprons or medical kits.

#### **Service Board**

Safety-relevant features for your battery service. Everything at hand for your maintenance and in case of emergencies. The battery service board has dimensions of 65 cm  $\times$  65 cm and includes:

- > 2x eye rinsing with mirror
- Safety goggles
- Acid gloves
- Acid neutralization spray
- Battery hydrometer
- Maintenance instructions in 5 languages
- Additional hook for other accessories
- Set of screws

#### **Battery Pole Fuse**

Short circuits can cause irreparable damage to vehicles and batteries. The battery pole fuse provides simple protection against high short-circuit faults and thus ensures greater safety in handling both vehicle and battery.

- ▶ No additional wiring required to attach directly to the battery
- Suitable for all approved Jungheinrich batteries with the Flex connector
- Amperage: 600 A
- Nominal voltage: 80 V DC
- ▶ Fuse connection tightening
- torque: 18±2 Nm
- ▶ Protection class: IP67/IP69K
- Housing: TPU UL94 V0

#### MATERIAL NO. PRODUCT

#### Battery Pole Fuse incl. M-10 pole screw

51759284 12 V-80 V

# **INSTALLATION HINT**

A good electrical contact between battery pole and battery pole fuse must be ensured.

Ŧ

#### Ion Exchanger

Demineralized water sustainably ensures the maximum lifetime of your forklift batteries. You can either buy expensive demineralised water, or you can produce it efficiently and economically yourself. It is very easy with the Jungheinrich ion exchanger. Just connect the ion exchanger to a standard water tap and the fully automatic desalination of the water starts immediately.

- No cost-intensive procurement and storage of distilled water
- Fresh water always available with no risk of algae formation due to storage/exposure to light
- ▶ Maintenance-free

# **Mounts and Accessories**

There is a variety of equipment that will make day-to-day work in the warehouse easier. RAM Mount offers a large selection of stable yet flexible mounting solutions that enable safe and handy placement of equipment in sight of the operator.

T

#### SYMBOLS MOUNTS AND ACCESSORIES

Large execution

#### Small execution

Easy installation

# **RAM Mount Principle**

The functional principle of these holders is always the same. Interlinked ball joints ensure easy positioning of the components. A strong clamp holds the rubberized ball joints. We offer RAM mount holders in three different system sizes. These differ based on the size of the connecting balls and thus of the possible load. The bigger the ball, the better it can hold heavy accessories.

#### **MORE SAFETY**

For secure attachment of accessories in unsprung industrial trucks, in which very high accelerating forces can occur, it is recommended to choose a system one size larger than derived from the pure weight.

# **RAM Mount Components**

A working RAM mount system, no matter what system size you need, always consists of three components.

#### Base

This ensures the attachment of the system to the vehicle or pedestrian.

**Connection Arm** 

• Ensures the flexible connection of vehicle and device holder.

**Device Holder** 

 Holds your accessories safe, handy and within view.

# **Bases**

A base is the foundation for your individual RAM Mount. They are available in different shapes and types of attachment, whether small and round or big and angular, from fixed mounting on a surface, to mounting around a profile, to tool-free and flexible attachment via magnet or suction cup. You choose what best meets your requirements.

#### **Round Base (Standard)**

Many round bases are equipped with holes in the AMPS industry standard pattern (4 rectangular holes,  $30 \times 38$  mm), as well as three additional holes at 120°.

۲ ۲

| MATERIAL NO. | BASE SIZE      | DESCRIPTION                                  |
|--------------|----------------|--|
| Round Base   |                |  |
| 51803634     | B (1" ball)    | Ø 6.35 cm (2.5"),<br>AMPS + 120°-drillings   |
| 51724762     | C (1.5" ball)  | Ø 6.35 cm (2.5″), AMPS                       |
| 51385943     | C (1.5″ ball)  | Ø 6.35 cm (2.5"),<br>AMPS + 120°-drillings   |
| 51193757     | C (1.5" ball)  | Ø 6.5 cm, M6, OTS,<br>with Jungheinrich logo |
| 51110348     | D (2.25" ball) | Ø 9.35 cm (3.68"), 120°/180°-drillings       |
| 51420170     | D (2.25" ball) | Ø 6.2 cm (2,437"), AMPS                      |
| 51603848     | D (2.25" ball) | Ø 6.5 cm, M6, OTS,<br>with Jungheinrich logo |
| 51692880     | E (3.38″ ball) | Ø 9.35 cm (3.68"), 120°/180°-drillings       |

#### **Rectangular Base (Standard)**

If a round base doesn't fit a rectangular base could be the better fit.

| MATERIAL NO.     | BASE SIZE     | DESCRIPTION                |
|------------------|---------------|----------------------------|
|                  |               |                            |

### **Diamond Base**

The diamond base uses two diagonal holes in the AMPS scheme.

| MATERIAL NO. | BASE SIZE     | DESCRIPTION  |
|--------------|---------------|--------------|
| Diamond Base |               |              |
| 51724769     | B (1" ball)   | 6.2 × 3.3 cm |
| 51421964     | C (1.5" ball) | 6.2 × 3.3 cm |

## **Single Screw Base**

The single screw base is the best solution for the attachment of lightweight accessories in narrow and tight spaces.

۲**٦** 

| MATERIAL NO.                   | BASE SIZE   | DESCRIPTION  |
|--------------------------------|-------------|--|
| A Single Screw Base            |             |  |
| 51724771                       | B (1" ball) | Drilling 9 mm  |
| B Single Screw Base with plate |             |  |
| 51724772                       | B (1″ ball) | Plate 3.8 × 4.45 mm (1.5" × 1.75"),<br>drilling 7.9 mm |

# **Bolt Ball**

A bolt ball is the most simple kind of base for your RAM mount system. The bolt ball can be easily screwed on.

| MATERIAL NO.                    | BASE SIZE                     | DESCRIPTION                    |  |
|---------------------------------|-------------------------------|--------------------------------|--|
| A Bolt Balls wit                | A Bolt Balls with male thread |                                |  |
| 51724773                        | B (1″ ball)                   | M6-1×6                         |  |
| 51724774                        | B (1″ ball)                   | M8-1.25×8                      |  |
| 51724775                        | B (1″ ball)                   | M10-1.5×10                     |  |
| 51724776                        | C (1.5" ball)                 | M8-1.25×10                     |  |
| 51724777                        | C (1.5" ball)                 | M10-1.25 × 10 (fine thread)    |  |
| B Bolt Balls with female thread |                               |                                |  |
| 51724778                        | B (1″ ball)                   | M6×1                           |  |
| 51724779                        | B (1″ ball)                   | 1/4″-20                        |  |
| C Other Bolt Balls              |                               |                                |  |
| 51724780                        | B (1″ ball)                   | With pre-drilled hole (Ø 8 mm) |  |
|                                 |                               |                                |  |

#### **Rail Base**

With a rail base, you can securely attach your RAM Mount to pipes and other round profiles.

| MATERIAL NO. | BASE SIZE      | DESCRIPTION                          |
|--------------|----------------|--------------------------------------|
| Rail Base    |                |                                      |
| 51716692     | B (1″ ball)    | For rail Ø 1.25–3.1 cm (0.5″–1.25″)  |
| 51716724     | B (1″ ball)    | For rail Ø 1.9–3.1 cm (0.75″–1.25″)  |
| 51716728     | B (1″ ball)    | For rail Ø 1.9–2.5 cm (0.75″ –1″)    |
| 51716694     | C (1.5" ball)  | For rail Ø 1.25–3.1 cm (0.5″–1.25″)  |
| 51716705     | C (1.5″ ball)  | For rail Ø 1.9–3.1 cm (0.75″–1.25″)  |
| 51385945     | C (1.5" ball)  | For rail Ø 3.2–4.7 cm (1.25″–1.875″) |
| 51716727     | C (1.5" ball)  | For rail Ø 3.2–3.8 cm (1.25″–1.5″)   |
| 51724781     | C (1.5" ball)  | For rail Ø 5.1–6.35 cm (2"–2.5")     |
| 51421942     | D (2.25" ball) | For rail Ø 1.9–3.2 cm (0.75″–1.25″)  |
| 51716706     | D (2.25" ball) | For rail Ø 3.2–3.8 cm (1.25″–1.5″)   |

#### **V-Shaped Base for Rails**

A V-shaped base is another possibility for attaching your RAM mount to round posts.

| MATERIAL NO.   | BASE SIZE     | DESCRIPTION           |
|----------------|---------------|-----------------------|
| B V-Shaped Bas | e for Rails   |                       |
| 51716687       | B (1″ ball)   | For rail Ø 2.5–5.3 cm |
| 51716690       | C (1.5" ball) | For rail Ø 2.5–5.3 cm |

#### INSTALLATION TIP

Of course, you can install our accessories yourself or leave it to our trained Jungheinrich technicians.

This saves time and resources.

www.jungheinrich.co.uk/services

### **Clamp Base**

For edged profiles, use the clamp base.

- Includes two screws with a maximum clamping depth of 5.3 cm
- Greater depth thanks to longer screws

| MATERIAL NO. | BASE SIZE      | DESCRIPTION  |
|--------------|----------------|--------------|
| C Clamp Base |                |              |
| 51716671     | B (1″ ball)    | Span 5 cm    |
| 51716676     | B (1″ ball)    | Span 6.35 cm |
| 51716679     | B (1″ ball)    | Span 7.6 cm  |
| 51716681     | B (1" ball)    | Span 10 cm   |
| 51716683     | C (1.5" ball)  | Span 6.35 cm |
| 51716685     | C (1.5" ball)  | Span 7.6 cm  |
| 51716686     | C (1.5" ball)  | Span 10 cm   |
| 51716730     | D (2.25" ball) | Span 5 cm    |
| 51716702     | D (2.25" ball) | Span 6.35 cm |
| 51716732     | D (2.25" ball) | Span 7.6 cm  |
| 51716703     | D (2.25" ball) | Span 10 cm   |
| 51716704     | E (3.38" ball) | Span 6.35 cm |

# **Cheese Plate**

The perforated plate (cheese plate) is clamped in between the safety rails of the overhead guard and serves as an attachment point for your individual RAM mount system.

- Several drillings in various patterns
- Can be flexibly equipped with several bases
- ▶ Full flexibility without having to interfere with a supporting structure

| MATERIAL NO.   | BASE SIZE    | DESCRIPTION                      |  |
|----------------|--------------|----------------------------------|--|
| D Cheese Plate |              |                                  |  |
| 51716701       | Without base | For overhead guard, without base |  |

#### ORDER RIGHT AWAY

No bases included. Please select bases matching your system size from our range.

## **Suction Cup Base**

Attach smaller equipment to the window of the driver's cab or other smooth and non-porous surfaces.

| MATERIAL NO.                               | BASE SIZE                                  | DESCRIPTION               |  |
|--|--|---------------------------|--|
| A Suction Cup Base with single suction cup |  |                           |  |
| 51716737                                   | B (1" ball)                                | 8.4 cm, with diamond base |  |
| 51716745                                   | C (1.5" ball)                              | 8.4 cm, with diamond base |  |
| B Suction Cup I                            | B Suction Cup Base with double suction cup |                           |  |
| 51716739                                   | B (1″ ball)                                | With diamond base         |  |
| Suction Cup Base                           | Suction Cup Base with triple suction cup   |                           |  |
| 51716754                                   | without base                               | AMPS                      |  |

## **Magnetic Base**

Three strong magnets in a protective shell of composite reliably hold the base wherever there are appropriate materials.

| ß |
|---|
|---|

| MATERIAL NO.  | BASE SIZE   | DESCRIPTION    |
|---------------|-------------|----------------|
| Magnetic Base |             |                |
| 51716746      | B (1" ball) | 6.35 cm (2.5″) |

With a clamp base as the first link, RAM mount systems can be quickly installed without tools. The claws can be mounted to a profile, e.g. around the pillars of the overhead guard of your truck or at edges or on struts.

| MATERIAL NO. | BASE SIZE     | DESCRIPTION                                    |  |

# Connectors

Connectors are the real reason for the flexibility of RAM mount. They connect the vehicle-mounted base to the device holder. The sturdy design of the connectors with the typical locking screw offers almost unlimited mounting options. Choose from a variety of lengths, rigid connectors or connectors with additional joint.

# HOW IS IT MEASURED?

The specified length is from center of sphere to center of sphere.

#### **Rigid Connector**

These rigid connectors are available for all system sizes and in various lengths.

| MATERIAL NO.           | FOR BASE SIZE  | DESCRIPTION                   |
|------------------------|----------------|-------------------------------|
| <b>Rigid Connector</b> |                |                               |
| 51716758               | B (1″ ball)    | 4.4 cm                        |
| 51803635               | B (1″ ball)    | 7.6 cm                        |
| 51716963               | B (1″ ball)    | 15.2 cm                       |
| 51193759               | C (1.5" ball)  | 8.9 cm                        |
| 51193756               | C (1.5" ball)  | 14.3 cm                       |
| 51935082               | C (1.5" ball)  | 23.2 cm                       |
| 51130355               | D (2.25" ball) | 8.2 cm (3.2")                 |
| 51716812               | D (2.25" ball) | 8.2 cm (3.2"), with lock nut  |
| 51130356               | D (2.25" ball) | 16.5 cm (6.5")                |
| 51716964               | D (2.25" ball) | 16.5 cm (6.5"), with lock nut |
| 51646909               | D (2.25" ball) | 32.7 cm (12.875")             |
| 51716816               | E (3.38″ ball) | 32 cm (12.625")               |
| 51692881               | E (3.38″ ball) | 18.4 cm (7.25")               |

#### **Connector with Joint**

This special variant of the double socket arm is equipped with an additional joint in the center, which can be moved by 180 degrees. Additionally, the two receptacles can be rotated by 360 degrees.

| MATERIAL NO.         | FOR BASE SIZE | DESCRIPTION         |
|----------------------|---------------|---------------------|
| Connector with Joint |               |                     |
| 51716789             | B (1" ball)   | 15.9 cm, with joint |
| 51716790             | C (1.5″ ball) | 20.7 cm, with joint |

#### **Other Connectors**

You can also compile an individualised connector. Select two adapters of your system size and either one gooseneck extension or an extension pipe. For lighter devices on 1" bases, three different lengths of gooseneck connections are available. For somewhat heavier devices in 1.5" systems choose from three rigid extension pipes.

| MATERIAL NO.     | DESCRIPTION                                  |  |
|------------------|--|--|
| A Adapter        |  |  |
| 51716792         | Base B (1" ball), 1/4" NPT thread (female)   |  |
| 51716802         | Base C (1.5" ball), 1/2" NPT thread (female) |  |
| B Gooseneck Ex   | xtension                                     |  |
| 51716794         | 15.2 cm (6"), 1/4" NPT thread (male)         |  |
| 51716796         | 22.8 cm (9"), 1/4" NPT thread (male)         |  |
| 51716801         | 45.7 cm (18"), 1/4" NPT thread (male)        |  |
| C Extension Pipe |  |  |
| 51716807         | 30.5 cm (12"), 1/2" NPT thread (male)        |  |
| 51716809         | 45.7 cm (18"), 1/2" NPT thread (male)        |  |
| 51716810         | 61 cm (24"), 1/2" NPT thread (male)          |  |

## **Connection Adapter**

With a connection adapter, you can connect two or three connecting arms with each other and thus obtain an even more flexible mounting.

| MATERIAL NO.            | DESCRIPTION       |
|-------------------------|-------------------|
| <b>Rigid Connection</b> | Adapter           |
| 51724782                | 1" double ball    |
| 51724783                | 1,5" double ball  |
| 51724784                | 2,25″ double ball |
| 51724785                | 1″ triple ball    |
| 51724786                | 1,5" triple ball  |

#### Antitheft

Replace the normal knob of the link arm with a Pin-Lock  $^{TM}$  that can only be loosened with a special locknut or a key-lockable knob.

| MATERIAL NO. | DESCRIPTION  |
|--------------|--|
| A Pin-Lock™  |  |
| 51724787     | Pin-Lock™ security knob, for all 1″ connectors               |
| 51717079     | Pin-Lock™ security knob, for all 1.5" connectors             |
| B Key-Lock   |  |
| 51717082     | Key-Lock security knob, with key,<br>for all 1″ connectors   |
| 51778389     | Key-Lock security knob, with key,<br>for all 1.5" connectors |

# **Device Carrier**

With a device carrier tray, the mount can be individually adapted. Bases and connectors can be used across the entire product range. A device carrier, however, specifically designed for a designated use and thus able to provide secure grip for accessories.

# **VESA Holder**

Industrial PCs and monitors usually offer the option of directly mounting a VESA standard holder. Thus, no manufacturer-specific device carrier is needed.

| MATERIAL NO. | BASE SIZE      | DESCRIPTION                             |
|--------------|----------------|---|
| VESA Holder  |                |   |
| 51640875     | C (1.5" ball)  | VESA 75, 9.2 × 9.2 cm (3.625" × 3.625") |
| 51716666     | C (1.5" ball)  | VESA 75/100, 12 × 12 cm (4.75" × 4.75") |
| 51531042     | D (2.25" ball) | VESA 75, 9.2 × 9.2 cm (3.625" × 3.625") |
| 51381069     | D (2.25″ ball) | VESA 75/100, 12 × 12 cm (4.75" × 4.75") |
| 51692882     | E (3.38" ball) | VESA 75/100, 12 × 12 cm (4.75" × 4.75") |

#### Tough-Tray<sup>™</sup> for Laptop

The Tough Tray<sup>™</sup> can be extended to the sides to fit a variety of laptops, netbooks and tablets.

- Secure hold through rubber grip clamps and a strong spring mechanism
- Clamps can be moved horizontally and vertically
- ▶ No blockage of keys, connectors or drives

| MATERIAL NO.                  | BASE SIZE    | DESCRIPTION   |
|-------------------------------|--------------|---|
| Tough-Tray™ Holder for Laptop |              |   |
| 51717062                      | Without base | Laptop holder,<br>(W × D) 25–40 × 25 cm, with flat arms |
| 51724788                      | Without base | Laptop holder, (W $\times$ D) 25–40 $\times$ 25 cm      |
| 51717023                      | Without base | Netbook holder,<br>(W × D) 21.7–28.2 × 15.2 cm          |

#### ORDER RIGHT AWAY

An additional base in your system size is required for installation. The holder has various holes corresponding to AMPS standard on its back.

# X-Grip<sup>®</sup>

- Especially suitable for mobile phones and small tablets
- Mounting using a spring mechanism with four to eight rubberized holders

| MATERIAL NO.        | BASE SIZE    | DESCRIPTION      |
|---------------------|--------------|------------------|
| X-Grip <sup>®</sup> |              |                  |
| 51716966            | B (1" ball)  | For 3"–4" mobile |
| 51716968            | B (1" ball)  | For 5" mobile    |
| 51716970            | B (1" ball)  | For 7″ tablet    |
| 51716994            | Without base | For 10" tablet   |
| 51717019            | Without base | For 12" tablet   |

#### ORDER RIGHT AWAY

The two X-Grip<sup>®</sup> holders without a base have prepared holes in the AMPS scheme. The complete holder requires an additional round or diamond shaped base in your system size.

# Finger-Grip™

If you do not need to quickly remove your mobile phone or radio from the holder, the Finger-Grip provides a secure solution that can be adapted to unusual housing formats.

| MATERIAL NO. | BASE SIZE    | DESCRIPTION             |
|--------------|--------------|-------------------------|
| Finger-Grip™ |              |                         |
| 51717020     | Without base | Holder for mobile/radio |

#### ORDER RIGHT AWAY

An additional base in your system size is required for installation. The holder has various holes corresponding to AMPS standard on its back.

#### **Cup Holder**

This vibration compensating cup holder is suitable for carriage of drinks and other liquids (without the cup).

| MATERIAL NO. | BASE SIZE   | DESCRIPTION   |
|--------------|-------------|---------------|
| Cup Holder   |             |               |
| 51717049     | B (1″ ball) | Self-leveling |

6

#### **Scanner Holster**

This scanner gun cradle holds all standard scanner guns.

- ▶ Holds all commercially available hand-held scanner guns to a width of 8.8 cm (3.47") and a length of 5.4 cm (2.16")
- Securely positions it using the elastomeric fins on the spot
- ▶ The unique open bottom design enables scanning while in the holder

| MATERIAL NO.    | BASE SIZE    | DESCRIPTION             |
|-----------------|--------------|-------------------------|
| Scanner Holster |              |                         |
| 51717051        | Without base | Holder for hand scanner |

#### **ORDER RIGHT AWAY**

For mounting this scanner gun cradle to your RAM mount system, you need another base. The scanner gun cradle can be attached to any AMPS hole scheme bases.

#### **Camera Holder**

Cameras and a variety of other devices can be mounted with this camera holder, using a 1/4" or 3/8" screw.

| MATERIAL NO.  | BASE SIZE     | DESCRIPTION                    |
|---------------|---------------|--------------------------------|
| Camera Holder |               |                                |
| 51717047      | B (1″ ball)   | Round, Ø 3.2 cm, 1/4"-20 screw |
| 51717046      | B (1" ball)   | Round, Ø 6.3 cm, 1/4"-20 screw |
| 51717045      | C (1,5″ ball) | Round, Ø 6.3 cm, 3/8"-16 screw |
| 51717060      | B (1" ball)   | GoPro® Hero adapter            |

#### **DIN A4 Writing Board**

High-quality writing board with rubber band and pen holder. Available with or without pre-mounted RAM mount "C" base.

| MATERIAL NO.         | DESCRIPTION                                       |  |
|----------------------|---|--|
| DIN A4 Writing Board |   |  |
| 51783268             | Board without RAM mount                           |  |
| 51783279             | Board with Jungheinrich RAM mount "C" (1.5" ball) |  |

#### Notepad

The Multi-Pad<sup>™</sup> is a simple little clip-on pad with magnetic pen holder.

This Handi-Case<sup>™</sup> is a note holder, desk pad, storage box and transport box all in one.

- Incl. magnets and a clamp, with which notes and pens can be attached
- ▶ The Handi-Case<sup>™</sup> also has various pilot holes to attach additional accessories

| MATERIAL NO. | BASE SIZE    | DESCRIPTION  |
|--------------|--------------|--|
| Notepad      |              |  |
| 51717033     | Without base | A Multi-Pad <sup>™</sup> organiser, note and pen<br>holder |
| 51717056     | Without base | B Handi-Case™, desk pad, with storage and handle           |

**Glare Shield** 

Provides ideal glare protection without taking away the view.

**ORDER RIGHT AWAY** 

various bases.

- ▶ Dark green 50 percent tint
- ▶ Is equipped with a 1" ball (size B)

| MATERIAL NO. | BASE SIZE   | DESCRIPTION |
|--------------|-------------|-------------|
| Glare Shield |             |             |
| 51717083     | B (1″ ball) | 8"×13"      |

## **Wireless Weighing System iForks-32**

When transporting incoming goods or determining shipping weights, the use of mobile weighing systems can significantly increase efficiency. Retrofitting such a system to a forklift truck is now easier than ever. The latest iForks generation enables wireless transmission of the recorded measured values via bluetooth 4.0. The weighing forks are powered by two long-lasting Li-Ion battery packs. This enables installation and commissioning of the system within a few minutes. The display is installed in the driver's cab with a RAM holder.

- ▶ Particularly flat design for perfect fitting to the forks
- Standard fork back for easy mounting also in combination with fork positioner
- Digital calibration
- ► Automatic tilt compensation
- Automatic maximum/overload protocol
- Automatic shutdown function for optimum energy management
- Overload warning

#### **TECHNICAL SPECIFICATION**

- Capacity: 2,500 kg FEM 2A (3,000 + 5,000 kg - FEM 3 on request)
- ▶ Multiple range display: 1–2 kg
- System tolerance: 0.1% of the lifted load
- Display: two-colour (green/red), digit height 22 mm
- ▶ 5 digits, with background lighting
- ▶ Protection class: IP65

| MATERIAL NO.                       | PRODUCT              |  |

 $(\mathbf{c})$ 

## **Sticker Bag**

Jungheinrich sticker bag includes warning and safety signs for your forklift.

The clear labeling with application instructions on the truck ensures safe handling of the truck, reduces accidents and thus protects people, material handling equipment and goods.

| MATERIAL NO. | PRODUCT   |  |
|--------------|---|--|
| Sticker Bag  |   |  |
| 51208713     | Bag with 14 various stickers, individually packaged in stain-resistant sleeves. |  |

# **Antistatic Band**

The antistatic band is applied directly to the truck frame. By discharging static electricity, the antistatic band protects people from electric shock by dissipating the energy of the truck body.

#### MATERIAL NO. LENGTH

Antistatic Band

**28421160** 530 x 20 mm

**PLEASE NOTE** The antistatic band is not suitable for

explosion protected vehicles.

#### Air Bulb Horn

Whether as an alternative horn for your ex-protection vehicle or as a retro gadget – the air bulb horn has a wide range of applications and is quick and easy to install.

| MATERIAL NO.  | PRODUCT        |
|---------------|----------------|
| Air Bulb Horn |                |
| 51315719      | Pneumatic horn |

ISO 9001 The German production facilities in Norderstedt, Moosburg and Landsberg are certified.

Jungheinrich trucks conform to the European Safety Requirements.
