# Original retrofits from Jungheinrich.

## For maximum warehouse efficiency.

### Original retrofit solutions from Jungheinrich.

With original retrofits from Jungheinrich, you not only benefit from enhanced productivity and safety in your warehouse, as the efficiency of your forklift trucks is also increased significantly. Even with simple retrofit options, you can easily adapt your trucks to satisfy new requirements.

The demands that a forklift truck needs to meet frequently change over the course of its life cycle – be it due to new safety specifications, legal regulations or modified warehouse and logistics processes. With our reliable retrofit solutions, you can respond to changing requirements with the utmost speed and efficiency, allowing you to maximise workplace safety without the need for costly and elaborate conversions.

To assist you with the implementation of individual retrofit solutions, our qualified service engineers are on-hand to equip your trucks or even the entire warehouse environment to the very latest standards.

#### **Service and Support** all from one provider

#### **Service and Support all from one provider.**

Worldwide standards in service quality, short distances to the customer and Jungheinrich employees who do everything they can to keep your truck fleet running smoothly. So you can fully concentrate on your core business.

- Tailored to the performance requirements of your truck
- Unchanged warranty and documentation

# Efficient. Safe. Reliable.

## Jungheinrich original retrofits for maximum performance

### Safety

Perfect conditions for safe working.

Retrofitting important safety functions is always worthwhile – be it in the form of early warning systems, access control or shock sensors. With our original retrofit solutions, your trucks will be well equipped for all eventualities.

#### Truck-specific assistance systems:

- LED working lights for maximum illumination with minimal energy consumption.
- Floor-Spot visual early warning system in different versions.
- EasyAccess system for protecting trucks against unauthorised use as well as other access systems.

#### Compliance with latest safety regulations:

- Original retrofits for meeting new legal regulations and occupational safety requirements.
- CE marking and unchanged warranty.

### Efficiency

Maximum performance with the most efficient solutions.

With Jungheinrich retrofit solutions, your trucks will always be state-of-the-art. Only with optimum interplay between all components will you benefit from maximum efficiency in your warehouse.

#### Lithium-ion retrofits:

- Increase energy efficiency by up to 25% by retrofitting your trucks with powerful lithium-ion batteries.

#### Enhanced productivity in the warehouse:

- Wide range of retrofit kits as fully integrated or stand-alone solutions.
- Maximum efficiency with integration of the electrical retrofit kits in the truck controller via the CAN bus system.
- Availability of original retrofits based on truck type and equipment.

### Reliability

Solutions as versatile as your truck fleet

Optimum integration: With our original retrofit solutions, we will assist you in meeting new requirements of your forklift trucks, without major conversions, or in equipping your trucks to your own individual needs.

#### Manifold retrofit solutions:

- In combination with intelligent CAN bus technology, our fully integrated solutions guarantee maximum reliability.

#### Qualified Jungheinrich service engineers:

- Professional configuration of your trucks and warehouse environment by qualified service personnel.
- Outstanding manufacturer competence and extensive product portfolio to meet individual customer requirements.
