**JUNGHEINRICH**

# The Jungheinrich battery charger service.

**Keeps your operations running 24/7.**

Our professional and reliable charger service verifies and upholds the functionality of your chargers, so that your batteries are not damaged during charging cycles and also remain fully operational at all times. After all, even a premium battery can only perform at its best when used with a fully functioning charger.

As well as conducting an external and internal inspection of all components, we also check all electrical lines for damage in order to prevent accidents and ensure flawless operation of the charger.

The charger service assists you in complying with all relevant regulations and inspection intervals, which massively contributes to the lasting performance of your systems. You also benefit from long-term investment security for your trucks, batteries and chargers.

**Service and Support**  
all from one provider

## **Service and Support all from one provider.**

Worldwide standards in service quality, short distances to the customer and Jungheinrich employees who do everything they can to keep your truck fleet running smoothly. So you can fully concentrate on your core business.
