

Services

Jungheinrich Original wheels and rollers.

Optimise the performance of your trucks.

**JUNGHEINRICH**

Original quality for maximum efficiency.

Wheels and rollers to fit all trucks.

With our high-quality wheels and rollers, you can transport your goods quickly and safely from A to B. Using the right wheels and rollers also ensures that your transport equipment always delivers maximum throughput performance.

Whether it's for abrupt braking or steering manoeuvres, travelling at top speed or under maximum load – the flawless function of your wheels and rollers is of paramount importance. Our extensive range includes a wide selection of load, drive and support wheels made from various different materials to suit your specific requirements.

Where necessary, our service engineers can be on-site quickly to take care of the installation work, thereby keeping downtimes to an absolute minimum.

Service and Support all from one provider

Service and Support all from one provider.

Worldwide standards in service quality, short distances to the customer and Jungheinrich employees who do everything they can to keep your truck fleet running smoothly. So you can fully concentrate on your core business.
